

## INSIDE THE DARDENELLES!

## Existing Blockade Has No Terrors for Ancient and Royal EBNY'S

"Seems like a long time between eats to me," remarked Commodore Childs of the "EBNY" Club. ¶ "Right, your excellency, but have you taken into consideration the existing blockade?" queried Fleet Captain Phillips. ¶ "Blockade be — blown," was the tart response. "Get the mine sweepers to work and lift it!"

Thus the annual dinner was arranged; Paris, the Hague, and Milwaukee all joining with Erie, Binghampton and New York in contributing to the pleasure of the evening. ¶ Incidentally tournaments were announced for officers and common sailors; Erie, Binghampton, and New York contributing the trophies. The Fleet Chaplain and Fleet Surgeon will hold themselves in readiness to offer consolation or surgical aid to members.

The noble flagship "Joyance" is at present anchored just inside the Dardenelles on the tenth hole pond of Course Number one. Visitors will be allowed on board only by presentation of passes signed by the Regatta Committee.

## Doubtless You Heard the Noise!

"The allies have taken Constantinople!" ¶ "Yes, but do you happen to know how today's ball game with Raeford come out?" ¶ "Sorry we can't give the information, because play is in progress as we go to press. ¶ Doubtless you heard the noise even if you didn't attend. ¶ "Central connect me with General Manager Walker!"

## WINCHESTER

## Loaded Shotgun Shells

## "LEADER" AND "REPEATER"

You can't buy a safer, faster, harder, a more even shooting or a better keeping load than Winchester "Leader" or "Repeater" smokeless powder shotgun shells. For field, fowl, or trap shooting, they are in a class by themselves, and give entire satisfaction in any make of shotgun. The results they give are due to their patented construction and the careful and exact manner in which they are loaded. The patented Corrugated Head used on Winchester shells is an invaluable feature. It absorbs the shock of the powder explosion and takes the strain from the paper tube instead of localizing it, as the old English method of metal lining does. That's why "Leader" or "Repeater" shells are stronger and less apt to cut off at the mouth than shells made according to English ideas of long ago.

## Linotype Solves the Problem

No doubt you have often wondered how "we" manage to get so much real news into type each week? A model 5 linotype solves the problem for THE OUTLOOK PRESS. ¶ More "human" than some folks we have met is this little machine—no false motions—just pegging right along towards the flag every minute! ¶ And when you come to think about it, that's always what really counts. The man who takes the most preliminary swings usually ends up by missing the ball altogether!
