

## American Red Cross

has shown its appreciation of the contributions made to its relief funds, the proceeds of Miss Priscilla Carver's concert under the patronage of the ladies of the village in a letter that speaks for itself.

## AMERICAN NATIONAL RED CROSS

CHICAGO HEADQUARTERS

March 30, 1916.

Mrs. Francis S. North,  
565 Sheridan Road,  
Winnatka, Illinois.

of our country.

We are deeply appreciative of this most signal assistance, which comes at a critical period.

May I call your attention to an article in the American Red Cross magazine (April issue) by Mr. E. P. Bicknell, about the relief of Serbian, Montenegrin and Albanian refugees in Corfu, Corsica and France, where thousands of homeless and destitute people have found temporary havens.

Expressing to you, and through you to all who assisted in the concert, our appreciation for your kindness in sending this check to the Chicago Chapter, and thanking you in behalf of the suf-

ANNIE OAKLEY

Who Has Taught Eight Hundred Ladies to Shoot This Season.

Mr Dear Mrs. North:—

In Mr. Sprague's absence from the city it gives me much pleasure to acknowledge and thank you for your kind letter of March 27th with enclosure of your check for \$221.30, which we note is to be equally divided among the children, homeless and destitute people of Serbia and Poland.

We note that this sum is from the proceeds of a concert given in the Carolina Hotel, Pinehurst, N. C., for the relief of sufferers in Poland and Serbia, and that it represents contributions from all parts

of our country. We are deeply appreciative of this most signal assistance, which comes at a critical period.

Very truly yours,

J. J. O'CONNOR,

Director Central Division.

P. S.—Official voucher from Orson Smith, Treasurer, enclosed herewith.

Send THE OUTLOOK to your friends. It saves letter writing. Ask for mailing envelopes.

## Sure Way to Prevent Hills and Hollows in Your Greens

GREENS' Keeper Flynn of the Marion Course says that "one of the greatest objections to the use of stable manures for making or renovating greens; is its tendency to produce hollows. The decay of the litter and consequent shrinkage causes the turf to sink in spots, often requiring bothersome and costly underfilling to restore levels."

The base of Alphano being a thoroughly decomposed rich soil humus in dry finely granulated form; it can be benely incorporated with the soil, giving a compact, firm, lasting surface.

Ton for ton, its humus value and plant food content is about five times greater than average barnyard manure; with the added advantage of being free from weed seeds and odorless. As a top dressing mixed with two-thirds soil, it is highly useful. Do not confuse it with the raw unprepared humus (sold under various brand names) which is being taken direct from its watery bed and shipped to the purchaser.

Send for the Alphano Book. Get full facts and figures.
