## Cantilever Golf Shoe For Men

*A Flexible Shoe for Your Flexible Foot*

A good golf shoe must be comfortable, must have a sole that will not slip under any circumstances, and be made of leather that will stand many wettings.

For comfort, a shoe should be built like a glove around the arch and heel of your foot, leaving the toes entirely free. It should be flexible and easy on your foot, supporting your foot where necessary and allowing, at the same time, perfect freedom which your flexible foot demands for the utmost comfort and ease in walking.

The Proof is in the Wearing.

*The Cantilever Shoe has all of these qualities—and more*

Herbert Lagerblade, holder of record on the new No. 2 course with a 66, is an enthusiastic wearer of this shoe and was wearing them when he made his record round.
