A Clean Atmosphere In Pinehurst

When Dr. Turck, of the Turck Laboratories of New York, last winter remarked that Pinehurst had a clear and wholesome atmosphere he was referring to the physical situation.

He could also say with equal justice that Pinehurst has a clean atmosphere socially, a good class of wholesome people, good neighbors, of the best character, people you like to live among.

Pinehurst is a community of character. That's one reason why it has become so popular.

Why MIDLAND FARMS Homes?

The United States by the last census showed a gain of over seventeen million people. Of that number more than half are by several hundred miles nearer to Pinehurst than to any other winter resort in the United States.

Two-thirds of the number are nearer Pinehurst by several hours' travel than to any other American winter resort of magnitude in the milder climates.

The number of people in the country is increasing faster now than at any time.

These great numbers will want winter homes, and a constantly increasing proportion will select Midland Farm acreage sites.
