STEN

Cauro, Ga., Augist 21st, 1961. Rock Hill Engry Co., Kock Hill, S. C. Dean Sirs:-I beg leave to state that your "Long-Winded" axb is a perfect success, laying the advantage over any other long distance axle I have ever seen, in that the oil cannot run out on the ground, but must be used up on the spindle; and, as the rand cannot get on the spindle to grind it out, I can sure that buggles with this axis will not have to have new points put on the axies, no matter how long the tuggy lasts. The farmers appreciate this advantage, hence "Rock Hills" are easy to sell, Yours truly,

"Cannot run out on the ground." That's the whole secret told in six words. But it "must be used up on the spindle," Of course, if it "cannot run on on the ground it must be used up on the spicdie," and that is the reason we've the dodge on all the balence of them. And it don't cost any more than the ordinary axle, but will run twice as long as any of them.

"The farmers appreciate this advantage." Anybody that don't want to be bothered to death oiling a buggy every few days will appreciate a thing that don't cost a cent and so sin ple a child can understand it. Has run 2035 miles with one oiling.

Rock Hill Buggy Company, ROCK WILL S. C.
