Health turns the Clock Backward

Tonsillitis Victims Find Way to Health

Thursday Health Talk, 5 By Mary Lou Miller, D. C. Ph. C.

In this disease the tonsils become swollen and the throat sore. There is a discharge of yellowish color which at first appears as small spots on the tonsil. These spots later run together forming patches which may cover the entire tonsil. There is chilliness and fever, with headache and backache. The appetite disappears. The voice is nasal. The urine is scanty and highly colored. The bowels sluggish and the breath foul.

Chiropractic nerve tracing shows by the tenderness of the nerves from the throat to the point of spinal exit, that there is pressure on spinal nerves. Chiropractic spinal adjustments will cause absorption of the poisons, and when adjustments are started soon enough, the disease never reaches its usual climax.

Corrected Tonsils and Stomach Too.

"I took all kinds of treatments for my stomach and tonsils but without any relief. I started chiropractic adjustments and in two months I was enjoying better health than I can ever remember enjoying before."—Roxie Schwenger, Chiropractic Research Bureau Statement No. 1614W.
