An Appeal for Books.

To the public generally, and to the Richmond County Woman's Club especially, this appeal is made, and it should touch a soft and responsive spot in the hearts of us all, as it's for our children, and our lovely new high school we appeal.

There has been set apart all over these United States, November 12th to 18th inclusive, to be known as Children's Book Week when people are asked to contribute books for school purposes.

In about two weeks the high school will move into the new high school building, and it has been proposed that all who will, join in and make a substantial birthday gift of books to the high school library. They are much needed, especially such books as those of reference, biography, historical fiction, and others of literary value, books we know and value—either old or new.

We are assured that such gifts will be gratefully appreciated, and the givers are asked to put their names in the books they send, so they may be remembered and thanked through the columns of the newspaper.

For convenience send books to the office of the old graded school.

Nancy P. Leak,
President of Richmond County Woman's Club.

CHIROPRACTIC

COMPARE THIS NERVE WITH THE ONE ABOVE AND THE ONE BELOW

THE REASON WHY.

A man is sick because something within him is wrong. All of your parts cannot be functioning properly and yet cause you pain. Each section of your anatomy needs a certain amount of nerve energy and when that is not supplied something goes wrong. Simple logic. Works on the same principle that when you have a leak in your gasoline tank the engine will give trouble, balk and finally stop. Chiropractic gets at the root of the trouble. Instead of hearing the noise under the radiator hood and messing things up in general, it finds out what is causing the trouble and then mends the tank.

But literally Chiropractic does get at the root of the trouble—the spine. It is the nerve center of the system. When the spine gets out of alignment it clogs up the nerves that send the force through the body. And the part affected can only be remedied by getting at the spine.

And this common sense principle is what has made Chiropractic such a success. Come to our office for consultation or spinal analysis.
