DESPECTFULLY informs the public t	 son Inman sprang to his feet in hi night clothes and responded with bullet. A volley was fired at him and he fell badly wounded. James Inman sprang up with pistols in his hands and dashed down the path like a will beast. He was fired upon and fe dead. The wounded man was secure and dressed. In a few moments of Mrs. Inman and her daughter appeare upon the scene, with their revolver buckled around them, and gave ver to their feelings in long and load cur ses. They said they scorned and defice a gang of cowards, when it took seven teen of them to kill one man and cap ture another. The daughter was splendidly formed woman, and com manded the admiration of every or present. She denounced the crow most bitterly, and asked them why the did not capture her brother and giv him a trial and a chance, if cuilty 	Il petticoat. Mothers can have fairy d tales, alphabets and small scholastic d works inscribed on their garments, and so instruct their children as they walk about with them. Fancy an announce- ment, "Madame Percale begs leave to call the attention of ladies about to visit the seaside to her new and richly embroidered petticoats, at one shilling each. Each petticoat contains an in- stalment of a new novel of great do- mestic interest, by Mr. Anthony Trol- lope, entitled 'Tucks or Frills.' The story will be complete in fifty weekly ever that journalism should not be re- tored in this way. For example,	Peruvian Guano	in limited quantities in Tennessee. It has been found in numerous localities. It is generally washed out of the sand and gravel of creeks and rivers. It has been found in Blount county, in Monroe and in Polk counties. The localities which have afforded most of the gold are those of Cocoa Creek in Polk county. The region of country affording evidence of its existence in this county is about ten miles long by three wide. It is intersected by the Jelico. A twenty- five dollar nugget was taken out of this place. The gold is derived mainly from quartz veins, liberated by disin- tegration. The rains and streams sub- sequently wash it into the bayous of rivers where it is found. By operating on the quartz veins directly by the new appliances lately brought into use, very profitable work may be done in the way of mining gold in this State.	A writer in the Homestead reports a statement made at the New Haven lectures, that by adding a tablespoon- ful of finest salt to a quart of cream, as the latter is skimmed from off the milk and placed in the cream pots un- til enough accumulates for churning, the time required for churning is re- duced to two or three minutes. In a trial made by the writer, he found this to be true, aad his theory is, that the salt acts upon the thin coating of the globules of butter, and so dissolves it that a slight agitation breaks it, and the butter comes at once. The ex- periment can easily be tried by any butter-maker. The laying of the submarine tele- graphic cable, intended to place Athens in direct communication with Syra, Carin and other islands, is completed in	A WOMAN'S SMILE.—A woman who lived very unhappily with her husband came to a great divine to ask his coun- cil. "Always meet your husband with a smile," said the wise man. She for- lowed his advice, and very soon returned to thank him for a happy home. When- ever a home landscape is dreary and its horison clouded, we believe that it proceeds not so much from the storms of plan's petulance and unreascuable- ness, as because woman has forgotten to draw a sunbeam from the Sun of Righteousness. "Cleanliness is next to go liness.;" and this is the reason, my little dears, why you are put in the tub on Saturday
