LIEUTENANT GREELY.

Lieutenant Greely, who was rescued by Commander Schley, is about forty years of age. He is not a graduate of any of the medical academies. He served through the war in the private in the federal army. His present rank is that of first lieutenant in the Fifth U. S. Cavalry.

HARD DRINKERS.

As hard drinkers the English are by the side of the Danes. Statistics in England show the consumption of ardent spirits per gallon a head annually. Not standing the wide difference between the countries in the matter of drink the proportion of crime and pauperism in each is about the same.

TEA AND COFFEE.

Why do Englishmen, Russians, Austrians and Chinese all drink tea, while Frenchmen, Germans and Irishmen all drink coffee? Coffee is the better stimulant of the two, and is easier of digestion. In America, there are many tea drinkers, but coffee leads in public favor. Temperance people will be interested in learning that medical experts have great faith in coffee as a substitute for ardent spirits. Generally when a man is able to obtain really first-class coffee he has no desire for liquor.

THE CHOLERA.

The steady spread of cholera in southern France leaves little room to doubt that the plague is on an extended tour. The requirement that all vessels leaving the infected shall carry clean bills of health amounts to very little. It is the opinion of medical experts that cholera will cross the water and make its appearance in this country sometime in the latter part of the summer or possibly as late as November. Taking the worst view of the situation the sanitary authorities of this country have several weeks in which to make their preparations. Thorough cleanliness and a rigid quarantine are the only safeguards.

CHARLEY HORN.

The father of the ill-fated Charley Horn told a reporter, the other day, that he had, since the disappearance of his son, examined personally over 700 cases of kidnapped boys, traveled thousands of miles and spent over \$50,000 in the vain endeavor to trace the boy. The Boston Herald says that there are hundreds of missing children in this country every year, but whether they are stolen or simply lost, it is impossible to say. The extraordinary efforts made by the police to hunt up little Charley and his abduction effectually checked the crime of child-stealing. Few criminals care to commit an offense which at once transforms every father and mother into a detective. The risk is too great, and the profit is too doubtful.

CHEAP IRON.

Iron and steel are now nearly as cheap as they ever were in this country, the Lackawanna iron and coal company's recent quotation of \$90 a ton for steel rails being the lowest ever named in the United States. Similar rails were quoted at \$88 to \$89 a year ago, \$85 in 1880 and \$172 in 1868. The average price of good American No. 1 foundry iron is \$19.50 a ton. It is a fact that in the past few years, the lowest price, \$16.80, being reached in November, 1878, and the highest, \$74, during the war, while in February, 1880, it was \$41. Hardly any iron is being imported and as railroad construction is comparatively at a stand, still quotations will probably remain unchanged for the present.

HAY FEVER.

The victims of hay fever have discovered that there is no known cure for this annoying ailment, but it will be some comfort to be assured that there is a way of warding off the disease. Dr. Dio Lewis, who has been subjected to hay fever for many years, says that the greatest immunity enjoyed by women may be traced to their table temperance. Many men of sedentary habits eat as heartily as farm laborers during hot weather and there is little doubt that their table excesses bring on the fever. By adopting a vegetable diet, and exercising freely in the open air, the hay fever can be prevented in the majority of cases. This is one of the instances in which an ounce of prevention is worth a pound of cure. When the disease once fastens itself upon a person, it is almost certain to strike him every year.

A NOVEL PLAN.

Pinkerton, the great detective, once adopted a novel plan for establishing the guilt of a suspected murderer. He was employed to work up a case against Johnson, a colored man, in South Carolina, who it was supposed to have committed a very brutal murder. Johnson was not arrested, but one morning when he went to take his plow to the field he found it splattered with blood. In the field he found little pools of blood. When he went back to the stable he saw the bloody imprint of a human hand on the door. Every hoe and rake had blood on it. By nightfall the murderer was paralyzed with fear and afraid to go to bed. He believed that the spirit of his victim was haunting him. The next day he cut his throat from ear to ear, and his suicide was regarded as conclusive proof of his guilt.

THE CHOLERA PATIENT.

A cholera patient feels well up to within a few hours of the attack. Sometimes he is seized with violent purging and vomiting immediately on rising in the morning. Judicious treatment during this first stage of the disease may bring about a speedy recovery, but if neglected, the sufferer complains of intense thirst, and a burning heat at the pit of his stomach, and also excruciating pains from cramped muscles. The pulse is rapid and weak, the respiration hurried and the voice husky. These conditions continue in the last stage of the disease, but the mind of the patient remains clear, and he desires nothing but sleep and drinking water. This stage seldom lasts longer than twenty-four hours, and reaction either commences or the patient dies in relation to, or passes on to the third stage, which, in ninety-nine cases out of a hundred, ends in death.

STATUE OF LIBERTY.

The Bartholdi statue of liberty for the bay of New York has at last been turned over to the United States government, and will soon be transported in pieces to the country. The dimensions of the colossal statue are almost incredibly large. The figure alone stands 105 feet; the extreme length from the sole of the foot to the top of the torch in the outstretched hand is 137 feet, 9 inches; the pedestal of granite will be 83 feet high, and the two together will give a grand total of 220 feet for the entire work. The monument on Fish street hill is only 209 feet high, and the famous colossus of Rhodes stood only 160 feet without its stockings. Some people predict that the statue will never stand, and that the winds and waves will play havoc with it. The engineers, however, are of the opinion that it is sufficiently substantial to hold its own.

WS NOTE.

Interest to All, and Abroad.

—The English sloop *Gov. Lincoln* was fired upon by the Spanish *derezo* on the morning of July 8. The gunboat says that he did not receive instructions from the general at Havana to look out for looking vessels, as it was sure that he was being carried in sailing vessels.

—It is officially announced that the visit to the palace at Warsaw has not taken place.

—It is reported from Tangiers that a French comedy troupe traveling through Algeria has been massacred by the Arab near the Moroccan frontier.

—Twenty-nine deaths from yellow fever occurred at Havana during the past week.

—One hundred arrests have been made at Warsaw, Russia, in connection with the plot to blow up the palace there during the czar's visit. The prisoners include Russians, Servians and Bulgarians.

—The public security in the suburbs of Constantinople has never been in a worse condition. A band of brigands entered a mosque four miles from the city and after firing several volleys into the ceiling, rifled every person present, securing money and valuables. Brigands also attacked and plundered the village of Buzhaki, a few miles outside of the city.

—A royalist plot is said to have been discovered in Paris.

—A dispatch from Bernes states that a storm had occurred on Lake Lucerne. Four boats were capsized and ten of their occupants were drowned. Some of those who lost their lives were foreigners.

—The British government has been arrested in Moscow with incriminating documents in a state of siege.

—The Mississippi Railroad Supervisory law of Mississippi has been declared unconstitutional.

—The National Prohibition Convention met at Elizabeth, Pa., and formed a permanent organization.

—United States detectives have made the important discovery that the Cuban revolution had been shipped from New York city to a depot of supplies at Nassau, New Providence, a large quantity of war materials, including dynamite, and about 1,000 pounds of nitroglycerine, said to have been pending.

—The Australian cricketers have been defeated by the English.

—The most serious case of cholera in the United States is reported from Louisiana. A divorced couple were sleeping in a room when the husband accidentally shot the driver of the hack.

—The private banking house of F. G. Hall has suspended. Liabilities \$100,000.

—Green's Bank, of Jackson, Miss., has suspended. The depositors are not satisfied that all creditors will be paid in full.

—The bricklayers of New York went on strike for working day for goods instead of money. The demand was in many cases complied with, and the men are confident of an early victory all over the city.

—A young man who prevented one boy from ill-treating another, was shot by the father of the first boy, Wednesday.

—The fireman of a locomotive murdered his engineer at Jackson, La., Wednesday.

—The most serious case of cholera in the United States is reported from Louisiana. A divorced couple were sleeping in a room when the husband accidentally shot the driver of the hack.

—At Cortland, N. Y., on Wednesday, while Barnum, Fuller, and Hutchinson's circus was giving its afternoon performance to an audience of 5,000 persons, a heavy storm of wind and rain came down upon the place.

PROTECTING AMERICA.

A Proclamation by the President of the United States.

Whereas quarantine regulations are committed to the several States, the general government has reposed certain powers in the President, to be used at his discretion in preventing a threatened epidemic.

Feeling it my duty, I hereby call upon all persons who, under existing systems in the several States, are engaged in the carrying of quarantine regulations to be diligent and on the alert in order to prevent the introduction of the pestilence which we so sorely fear, and has made its appearance in some of the countries of Europe, between which and the ports of the United States intercourse is direct and frequent.

I further advise that the cities and towns of the United States, whether on the coast or inland, and the ports of the United States, by second sanitary regulations and the production of cleanliness, be prepared to resist the power of the disease and to mitigate its severity.

I further direct the Consul of the United States in the ports where the pestilence has made or may make its appearance to exercise vigilance in enforcing the instructions heretofore given, and in communicating to the government of the United States any information he may receive as to the progress or treatment of the disease.

Under my hand and the seal of the United States, at the City of Washington, this 11th day of July, in the year of our Lord one thousand eight hundred and eighty-four, and of the Independence of the United States the eighteenth.

CHESTER A. ARTHUR.

THE PROHIBITION CONVENTION.

Gov. St. John, of Kansas, Nominated for President—The Platform.

In the National Prohibition Convention in session in Pittsburgh candidates were placed in nomination as follows: Dr. H. H. McDonald of California, ex-Gov. W. B. Stewart of Ohio, Gen. Clinton B. Fisk of New Jersey, and James Black of Pennsylvania. Ex-Governor St. John was unanimously elected by 408 yeas and 22 nays. The platform was presented and adopted by a very large majority of the delegates, and arraigns the Democratic party "with severity" as being "the enemy of the Union in favor of all money, coin and paper, being made by the Government, and that Congress should abolish all of its institutions, and that the revenues from liquor and tobacco should be abolished. Another plank in the platform is that no money should be loaned to the Union unless its constitution shall expressly prohibit polygamy.

A Partisan Session.

The body of the well known distiller Bullard was found in the Seine with a bullet through the head. His ring, which was a valuable article, and which he wore on his finger, was in the waistcoat pocket where missing. Mr. Volkmar had recently been greatly depressed on account of monetary troubles. He was last seen in the city last night in the pavilion Henri Quatre, in La Me. St. Germain, with a lady with whom he is supposed to have had intimate relations. It is commonly held that he had been shot by a woman who had recently purchased a pistol. The affair causes a great sensation in Paris.

Incidents of the Plague.

Isolated cases of cholera continue to be reported in various parts of France, some widely distant from an infected district. A woman living at Combeville, a village only a few miles from Paris, was seized with cholera on Tuesday. She was at once conveyed to the hospital, and her lodging was thoroughly disinfected. No apprehensions are entertained that the disease exist in the community. Two cases of cholera have occurred at Narbonne and at St. Nazaire, a few miles from Toulon, and two deaths from this disease have occurred. One of these deaths was of an especially pathetic character. An unknown woman was seized with the dread disease while passing along the street. She fell prostrate to the ground and expired immediately. A pitiable case is recorded at Lyons. A man and his wife of over seventy years were missing for several days. The police at last forced an entrance into their house, and found the couple upon the floor in such a condition that they must have died for some days. Examination proved that she was a victim of cholera. She had lived almost exclusively on fruit.

At the meeting of the Cabinet, at Washington, it was decided to take prompt and energetic measures to prevent the introduction of cholera into the United States. The State and Treasury Departments will be in conjunction in enforcing the regulations which are proposed.

A Large Colliery Burned.

The Derringer Colliery, Derringer, a village near Hazleton, Pa., owned by Cox Brothers, has been destroyed by fire. The building was entirely destroyed. The shops and offices were saved with the exception of one. The breaker was about the largest in the coal region. It was a new one, having been completed only a year ago. It cost over \$150,000, and was fitted with the most improved and expensive machinery.

By this fire over six hundred men and boys will be thrown out of work, and the village of Derringer, which was entirely dependent on the colliery, will be paralyzed. It is impossible to learn the origin of the fire.

Mayor Smith, of Philadelphia, has asked the Quarantine Commissioners of the Quarantine City to make a good showing at the New Orleans Exposition.

The defunct Manufacturers' Bank of Milwaukee, offering two-thirds cent cash and seventy-five cents in equal payments at one, two and three years.

The Grand Jury of Pittsburgh, Pa., have concluded their case against the "fallen Planter" and "the fallen" man.

Queen's Bank.
