Next week: Chautauqua.

Register for the school bond election.

Burleson got those wires short circuited.

Have you taken the free anti-typhoid treatment?

The League of Nations will have to stand some Knox.

The question before the house is: Will the War Tax make women's skirts any tighter?

Peace treaties, like murder, will out - even though they be "upon covenants, openly arrived at."

Woman Suffrage seems destined to be Nineteenth Amendment to the U. S. constitution.

If the Germans are hungry let 'em eat some the plentiful supply of crow the Peace Conference has provided.

Bolshevik mathematics as expounded by Artur P. Skeleton: Add theory. Subtract justice. Multiply trouble. And divide everything.

Austria claims that under the terms of peace treaty she is "practically ruined" - which leads to surmise that the treaty must be satisfactory in every respect.

NOW IN TOWN

A member of the Army Recruiting Party is here and will be in town until June 17, 1919.

He can be found in uniform at the Postoffice from 8 A. M. until 6 P. M. and in Rosemary at the Postoffice for the remainder of the day.

Men accepted by him will be given a ticket to a Recruiting Station.

From the Recruiting Station applicants for enlistment will be sent to Fort Thomas, Ky. for enlistment. From there they will be forwarded to an organization of the branch of service for which enlisted.

Now is your chance to enlist.

PAINT PROTECTION AND ITS ECONOMY.

The preservation of structural materials, which may be obtained through the application of paint, constitutes a most vital means of furthering the conservation of our natural resources. It is, moreover, the most economical method of sustaining the appearance and general upkeep of any community.

A structure coated with sheets of India rubber would not be as well protected from decay as a structure coated with a good oil paint. This is due to the fact that a sheet of rubber is not as durable or as waterproof as a thin dried film of paint. The latter material when applied dries to a continuous elastic film containing finely divided particles of metallic, wear resisting pigments. A square foot of such a film upon a wooden surface costs less than a penny, yet it will beautify and protect a dollar's worth of surface for many years. This is a low rate of interest.

Buildings, barns, outbuildings, sheds, gates, fences, stock enclosures, wagons, implements, vehicles and other structures, whether of wood, iron or concrete, should be preserved, through the use of paint, from rapid decay. High grade paint is now sold commercially for all purposes, ready for use with only the addition of pure linseed oil. Paint is cheap. Use it.

Catarrhal Deafness Cannot Be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness and that is by a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surfaces. Hall's Catarrh Medicine acts thru the blood on the mucous surfaces of the system.

We will give One Hundred Dollars for any case of Catarrhal Deafness that cannot be cured by Hall's Catarrh Medicine. Circulars free. All Druggists, 75c.

We have a reason for everything we sell

Ask us about any product we sell whether - and find out why we sell it.

Take ROYAL for example - baking powder that we advise recommend. Maybe you have wondered why.

Well, ROYAL is economical and dependable.

Economical—because you pay only a fair profit (just for other high-grade baking powders).

Because you use less.

Because it is light in weight and there are more teaspoonfuls per pound.

Because it is absolutely pure and permits no waste from unsuccessful baking.

Dependable—it is made of a rare and superior kind of cream of tartar — bi-sodium phosphate.

It is less susceptible to moisture—it is made by a patented process.

The directions call for "level" measurements which insures accuracy.

The ROYAL Baking Book takes the "guess" out of baking.

Doesn't it count for something with you to buy your groceries from someone who knows all about them?
