PREPARE FOR COLLEGE NEW CAMPAIGN SLOGAN

ENLARGING SCHOOLS TO OBSERVE
MAY 14 TO GIVE STIMULUS
TO IMPORTANT MOVEMENT.

Public schools here have been requested to observe May 14, which has been designated "Prepare for College Day" in this state and in the other states comprising the Fifth Federal Reserve District.

During chapel exercises, or at other specified periods that day, it is suggested that addresses be made in the high schools by leading business men and prominent educators, and in the elementary schools by the teachers. The purpose of the observance, it is explained, are to stress the importance of a college education and to offer suggestive methods whereby the pupils and their parents may plan ahead with a college course definitely in view.

Women's clubs are being asked to help in the movement, and the Rotary clubs also are expected to take part, while many churches have expressed their interest and indicated their desire to participate. Further, the United States Treasury Department, through the district War Loan Organization, is lending assistance, and the general plan, it is announced, has received the heartiest approval of practically every college president in the state.

Miss Mary G. Shotwell, director of the educational division of the War Loan Organization of this district, recently discussed the project before the convention of the Virginia Association of Women's Colleges and Schools. The association, by resolution, pledged its "unflinching and hearty co-operation in carrying out all the plans."

It is proposed by the Treasury Department that parents who desire to send their sons and daughters to college and that boys and girls who wish to provide a college fund for themselves—that they definitely plan for the future and make regular systematic saving a part of their plan. As safe, productive investments for such funds government securities, such as Treasury Savings Certificates and War Savings Stamps, are suggested.

Observance of "Prepare for College Day" will be fruitful of extensive results, it is believed, and the stimulus toward higher education is expected to be very valuable, particularly since the statement has so frequently been made recently and so authoritatively that never before has the country been in more imperative need of well-trained and trained men and women.
