TERRIBLE WRECK ON THE SEABOARD

Two Trains Plunged Down Into A Deep Ravine.

NEAR CATAWBA JUNCTION.

No. 41 En Route to Atlanta, En- straight-away for perhaps a mile. counters Sinking Bridge—Rails On One Side Widen—Freight No. 646, Which Was Running Not Far Behind, Adds to Horror of lanta, Ga. The Catastrophe by Piling Down Upon the Passenger Coaches.

(Special to The Observer.)

CATAWBA JUNCTION, S. C., September 9.-Five dead and several in a dying condition is the result of the catastrophe which took place at six minutes past 1 o'clock this morning, when the Seaboard passenger train No. 41 sped across a sinking bridge 300 yards south of the Catawba river and two miles from Catwba Junction, and then plunged from the tracks down a steep embankment about 30 feet high, only to be followed by an extra freight engine, No. 654, with a caboose attached, mingling the two flyers in a mass of wood, steel and iron with about 40 pieces of human cargo. There was not a single soul among them that escaped unhurt.

It was said by trainmen of long experience that a more complete demolishment of railroad equipment could scarcely be imagined. So thoroughly ruined were the engines and the coaches that the trainmen were on the point of setting fire to the debris, but the authorities of York county stopped them. The scene | ders. at the bridge beggars description. The engines lie overturned-huge, shapeless monsters of iron, with their helmetshaped sand boxes and other parts scattered within a radius of 100 feet. The coaches are like crushed wooden shells, with their red plush seats in indescribable confusion; trucks, wrenched loose from the bottom of the cars, are scattered around; about the only part or parcel of the railroad equipment remaining intact are the two red lanterns swinging from the rear of the Pullman.

CAUSE OF THE DISASTER.

There were many theories advanced to-day as to the cause of the accident. The railroad men fell in line with the opinion of Mr. George S. Fitzwater chief detective of the Seaboard Air Line, that the collapse of the bridge and the tearing loose of the right hand rails, were the result of the work of some malicious person or persons. Mr. Fitz-

to be hurled over the embankment. What motive there could be for anyone to bring about such slaughter, and who the guilty persons might be, neither Mr. Fitzwater, nor the other railroad men attempted to explain. A close examination of the rails, ties, road-bed and bridge was not productive of much light on the subject; all appeared to be sound and solid. The rails on the side where the train toppled to destruction were twisted to an arc shape. The track is not a curve in the vicinity; it stretches

T. F. Black, Ohio; Norfolk and Western Railroad telegrapher. Robert Siegle, address unknown.

Mollie Griffin, Tuskegee, Ala. A number of colored laborers also were slightly hurl.

HOW THE TRAGEDY OCCURRED No. 41 left Monroe with an express car, a mail car, two day coaches and a Pullman. Starting 15 minutes behind, water showed six spikes and several was light engine No. 646. The wreck at angle-bars which he picked up near the the bridge was 28 miles distant from

wreck and said that they bore the marks | Monroe. After No. 41 had ruched across of having been tampered with. Upon the bridge and fell, going, the engineer this theory, it was concluded that the said, at 40 miles an hour, she became passenger train had struck weakened enveloped in total darkness. The engine spots on the lower half of the bridge A plunged and rolled from the track, carryspeed of 40 miles an hour had enabled ing the entire train with it, so that there the train to carry itself almost over the was not a single bit of it upon the rails sinking structure, but the rails had Every sign of it was below the level of widened; the Pullman, which did not the track. The engineer of No. 646, folquite clear the chasm, acted as a draw- lowing about six minutes behind, acback, the engine careened, tearing from cording to an eye witness, could not contheir fastenings the rails on the right sequently, have had the slightest intihand side going south, causing the train mation of any trouble ahead. The

freight's search-light was an oil burner the Pullman no one was hurt very bad- freight was upon us. It was disheartenrush and then sailed through the empty space above the cllapsed part of the structure, grazing the top of the Pullman and crashing into the side of the rear passenger coach with frightful force, laying its iron nose full in the middle of the coach. Interviews with a number of the sur

vivors were ghastly. They, one and all. concurred in the essentials of the affair. Most of them were sleeping. There were 16 negro laborers in the first passenger coach, next to the mail car. In the smoking compartment of the second passenger coach there was no one except Mr. C. S. Coleman. In the coach itself there were Mr. and Mrs. Black, Mrs. Mc-Manus, and several others. In the Pullman were Mrs. Herbert, Mr. and Mrs. Silvey, Mrs. Clay, with her six-monthsold baby and two or three men. The crash over the embankment killed the fireman, who was a negro named Ed-T. C. Jerome, Atlanta, Ga., slightly ward Robers, and Mrs. Black. Engineer G. H. Meares said this morning that he Mrs. T. C. Jerome, Atlanta, Ga., felt the bridge sinking beneath the engineas it neared the farther side; then came the plunge downwards. He says

which did not cast its rays very far, No. ly, for only the light caboose had struck ing. I remember that the screen 646 took the front of the bridge with a it with force. Mrs. Clay was sitting the groans subsided after quietly nursing her child when the crashed into us. My prince freight came. It threw her against the glass cutting about the face. There was not the least scratch inflicted on the child, which she held all the while in her arms. Engineer Barksdale, of the freight, was probably killed instantly. At about the noon hour his body was recovered from the cab of his engine, with a few bruises and a bad wound on the head. His watch was running on schedule time when the dead engineer was taken from his post of duty. His fireman, Tom Jefferson, escaped with inconsequential wounds on the head and

> According to the testimony of several of the passengers I talked with, a brakeman was heard to shout out just before the freight arrived; "My God, the freight is coming on us!" It was impossible, however, for any one of the trainmen or passengers to flag it down in time to avert the added disaster.

> HEROISM AND FORTITUDE DIS-PLAYED.

Mr. Black, with his young wife dead beside him, stuck to the coal and was

Chief Detective Fitzwater fortui

ly was at Monroe when the accident curred, and he went with the first relie train, taking an energetic and painstaking part in alleviating the distress and in keeping order all through the day. After he discovered the spikes and bolts and angle-bars which he believed showed mischief, he sent a joint telegram to Superintendent E Berkeley, at Atlanta, and Claim Agent Santley, at Portsmouth, the company's headquarters, telling them that he had discovered evidences of malicious work and expressing his belief that some scoundrel had disconnected the joints in the lower half of the bridge. Then he said to me: "I have sent | this for the two best detectives we have, and | ner 📢 I expected to pursue this evidence of porata foul play to the bitter end."

It may be that the track will be in condition for travel by to-morrow night, and the crew and general laborers are making strenuous efforts to accomplish this. All day long crowds came from all over York and adjoining counties to view the scene of the disaster. As afternoon came on, it seemed that they would fill the fields bordering the locality. The bridge spanned a marshy ravine, on each side of which the bluffs about 30 feet high, rise rather precipitously. At Rock Hill and nearby towns there was a deep sense of awe to be observed. People remembered the disaster, somewhat of a similar nature which took place on the Southern Railway at Fishing Creek about the same distance from Rock Hil as is Catawba Junction, and it happened just about the same time of last year. To-night the wounded who had been in the farm houses near the wreck were removed to the hospital at Rock Hill Crowds of people were at Catawba Junction and at Rock Hill when the train ar-

in North Carolina.

SLIGHT INJURIES OF MAJORITY The express messenger and the mail clerk escaped with a few slight bruises. They quickly got out from the wreck and built a fire on the track ahead, but not until after the freight had come with its deadly work. The negro laborers, who were bound for Georgia to work on the Seaboasd's projected line vestward from Atlanta, sustained comparatively slight injuries, but everyone carried some mark of the disaster, and one of them, James Eggleston, 56 years old, was badly cut about the face and generally bruised. Mr. Coleman, in the smoker, was thrown violently against Things were so topsy-turvy that in the arkness he could not tell which way to turn. He finally managed to find a window and was getting ready to crawl Van Wyck, a little town nearly. He had from it when he saw the light of the coming fright looming near. He quickly drew back and barely escaped death, freight came along. He said that he had for the freight engine fell upon the coach not far from him. Mrs. McManus had not been hurt very badly by the fall of the passenger train, and two men in the coach had helped her to a reclining Flagman Duncan and the old negro, posture on the right and upper side of Eggleston, were taken to the Allison the coach. She was resting there when place several hundred yards from the the dread black mass came tumbling wreck, where they were put to bed and forward through space, crushing her received medical attention. Mr. Coleman fearfully. Mrs. Black had her neck though in a weakened condition, talked broken from the first mishap. In the of the tragedy.
