Large Capacity, strength and unequalled speed, simplicity and completeness of operation are qualities peculiar to THE NONPARIEL

Washing Machine,

It is a Squeezing Machine constructed on strictly mechanical principles, and the experience derived from five years extensive use in families, hotels and public institutions proves it to be of lasting value to the purchaser. The manner of operating the Nonpariel, by rotary motion acting on a crank-shaft (with balance-wheel) which moves the plungers alternately, is the simplest, least laborious and most powerful that can be devised for the purpose, and accomplishes the work with the greatest rapidity and the least possible labor. The great speed with which the machine performs work will be understood from the statement that it is geared to give six strokes of the plungers for one turn of the handle or, when worked leisurely, about four hundred strokes in a minute. Safety to the fabric washed is insured by the entire absence of rubbing. A girl or boy of fifteen can work the machine and do a week's washing for a family of six or eight persons in two to three hours time; and it may be relied on to cleanse the clothing thoroughly, without assistance from hand rubbing. Send for free Descriptive Circular and terms to dealers, to whom exclusive right of sale is secured.
