

SILO REDUCES FEED COST

How to Build a Good One With Ordinary Farm Tools Told in Southern Railway Folder.

How the average farmer, using ordinary farm tools, at an expense of only \$65.00 can construct a silo with a capacity of 55 tons—enough silage to feed 20 cows 40 pounds per day for four months—is told in a booklet just gotten out by the Live Stock Department of the Southern Railway, a copy of which will be mailed free to any farmer addressing request for same to Mr. F. L. Word, Live Stock Agent, Southern Railway Building, Atlanta, Ga.

"Where there is Live Stock on the Farm There Should be a Silo" is the title of this booklet which tells of the advantage to the farmer of having a silo and the great saving which enables him to make in the cost of winter feeding for his live stock. The figures given are taken from the practical experience of a Tennessee farmer who built a silo on the lines indicated twenty years ago, who finds it as good as new today, and feels that it has paid for itself many times over every year.

Secretary of Agriculture Wilson has recently declared that the Southeastern states constitute the ideal section of the United States for live stock raising and must be looked to in future years for the nation's food supply. To stimulate interest in the live stock industry and to aid farmers to successfully follow this line, the Southern Railway has established its Live Stock Department which is giving undivided attention to this work.

ECONOMY IN DAIRY.

The problems of dairying are not all mysterious or difficult of solution. It is a question of obtaining a cow that will give the most milk for the feed consumed, and in supplying that cow with the feed which will make milk. These, together with good care as care is ordinarily understood by the man who is successful in handling live stock, will make the dairy herd profitable and highly successful.

GOOD DAIRY FARMER.

A good dairy farmer has been described as "a good general farmer plus the love of cows." This is a good definition, because the man who does not have a fondness for satisfaction in caring for them seldom turns out to be a very capable and prosperous dairy farmer.

SILAGE FOR CALVES.

Calves at the age of three or four months will consume some silage if care is taken to pick out the leafy portions for them. It does not take them long after this before they will consume a considerable quantity of silage.

Live Stock Notes.

Do you use the whip because you have it handy?

Are you humane in the treatment of the animals you drive?

A horse's pulse beats from thirty-six to forty times a minute when he is in health.

A mule is no more prone to kick than a horse unless he is taught to do so by bad treatment.

Are you one of the unthinking who starts a horse with a blow instead of using your voice?

Do you want a balky horse? You can easily have one by giving him too heavy loads to draw.

If the horse must be kept in the barn during hot weather keep all the doors and windows wide open.

Oats is the most perfect all round feed for horses at any time of the year. Barley is a close second.

It is a good sign to see a pair of scales in the stable, but you have to use them to get any good from them.

Carrots must be fed sparingly to working horses. Cut them in slices. They are a laxative, and affect the kidneys also.

Lop off the ration of all kinds when the horses are doing little or nothing. They are too much like a man to stand heavy feed while lying still.

Stuffing the colt with hay or straw or any coarse feed will spoil its looks. Keep this ration down by the use of some grain and less coarse feed.

Watch the hired man with your horses. If they cringe, dodge or show signs of fear while with him, take my advice and "fire" him. A good horse is spoiled when he is a victim of fear.

Don't make your horse wait till he is cooled off before you give him a drink. Take a couple of quarts in a pail and give that. Then wait a while and give as much more. By this you will save a lot of suffering on the part of your horse and he will come out all right too.

FOLEY KIDNEY PILL

FOR BACKACHE, KIDNEYS AND BLADDER

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.
