

## ROAD WORK BEGINS.

Col. Wonders, United States Government Road Engineer, of Washington, is in the city, and accompanied by the road trustees of Sylva township, has carefully gone over the roads from Sylva to Cullowhee and from Sylva to the Scott's Creek township line. He secured samples of rock and other road material that is easily accessible and has sent them to the road department to be analyzed in order that there may be no mistake made in the material to be used in the construction of the first improved roads in Jackson county. It was the intention of the road trustees to begin the surveying of the routes for these roads, Tuesday. However, on account of the heavy rains it was impossible to do so, but the surveyors will start their work this week and the work will be done as rapidly as possible.

The law, providing for this work, as passed by the last General Assembly, also provides in section 20, "That the provisions in this act shall apply in all their force and effect to any township in Jackson county not especially named herein, upon petition signed by a majority of the qualified voters of such township, and the board of county commissioners of Jackson county shall upon receiving such petition, appoint a board of road trustees for such township aforesaid of not less than five members (not more than four shall be chosen from any one political party) who shall organize and proceed to carry out the provisions of this act as is provided for the townships named herein, Provided, that the bond issue for any further townships coming under the provisions of this act shall not exceed the sum of thirty thousand dollars." The section of good roads act gives any township in the county the prerogative of petitioning the county commissioners, issuing township road bonds and constructing improved roads. What township will be the first to take advantage of this opportunity and join the good roads movement that is sweeping over North Carolina?

## A WORD TO THE WISE

**D**ON'T be a pessimist. A pessimist is never wise. He only sees the other fellow's advantage—not his own. The average merchant is a pessimist about the parcel post. He sees in it only an advantage to the mail order house. But if he would look a little further he would see in it possibilities for his own development hitherto unsuspected.

By means of it he can reach every customer within fifty miles of him more cheaply, more quickly and more satisfactorily than any mail order house in a big city. He should hasten to make the buyers in this territory acquainted with this fact. Then he should back up his advertised claims for his goods with absolute fidelity. The sequel will be inevitable success.

WATCH HIM GROW.
