ing space in the daily and weekly papers to information as to the best farm methods. He suggested that newspaper men acting as correspondents of papers published in other localities should embrace every proper opportunity to incorporate in their news letters and despatches matter that would serve to attract favorable attention to their communities. Speaking of the exceptional opportunities for community development in the Southeast, Mr. Finley said: "It is a field in which intelligently directed efforts are sure to bring results. The members of this Association have been among the most effective workers for community development in the past and I know that your efforts will be continued. I wish each one of you the largest measure of success and assure you of the hearty co-operation of the Southern Railway Company in community development."
