Good Roads in Durham.
Durham—The county road force has completed that part of the central highway in Durham county and when Orange county connects with this road leading out of West Durham there will be a good road from this city to Greensboro. One gang of the convict force is now working on the Durham end of the Quebec and Miami road, which is known as the Oxford road. It will take something like three months to get a four-mile gap in this road put into the proper condition for travel.

Held On Serious Charge.
Greensboro—W. C. Tise, a Winston-Salem business man, and his stenographer, Miss Lillie Tess, are under bonds of \$400 to appear in police court and answer to charges of immorality. Some time ago the woman came to Greensboro and took apartments and to her a child was born. After the birth, man, woman and child left in an automobile. The child was left with a woman in the suburbs of Winston-Salem, where it died. Investigation when a burial certificate was requested furnished the clue.

To Start Drainage Work.
Fayetteville.—The Brett Engineering & Construction Co. of Wilson has been awarded the contract to do the excavating work in connection with the drainage of the swamp lands of Flea Hill township. The work will be begun as soon as the commissioners of the drainage district sell the bonds. The property will be assessed according to the classification of the lands which will be made before the sale of the bonds. The Brett Company was given the contract at 6.37 cents the cubic yard.

SILAGE FOR ONE ACRE.
A yield of 12 tons of silage may easily be obtained from one acre of corn. Allowing 30 pounds of silage as a daily ration, one acre of corn will furnish four cows with silage for 200 days.

SHED FOR SUNNY DAYS.
A good covered shed well bedded with straw, will make a fine place for the cows to lie in on days when they can not go out in the fields. It will also help you to get a nice lot of manure.

FEEDING JUST ENOUGH.
In feeding cows do not give them more than they can use readily. Any feed that is left in the mangers after the cows are through will naturally present a certain amount of waste.

States Great Progress.
Referring to the dependence of production upon highways to market, Mr. Finley said it was not a mere accident that the progress of North Carolina in recent years had been coincident with the development of more efficient transportation agencies. Re-
