

**NORTH CAROLINA STONE  
AT LONDON EXPOSITION.**

Washington, June 14.—At the Anglo-American Hundred Years Peace Exposition, now open in London, the Southern Railway System has the only exhibit made by an American railway and much attention has been attracted by the handsome display of Southern agricultural, horticultural and mineral products. The exposition will be open until November and will be visited by millions of people who will thus have the advantages of the South put before them.

The exhibit is enclosed by polished balls and pedestals of Tennessee, Alabama and North Carolina marble, set on oak posts connected by brass railing. Beneath the railing are blocks of granite from North Carolina and South Carolina quarries. Show cases at the front corners contain specimens of cotton stalks seven feet high filled with bolls. Other cases and tables contain tobacco, fruits, corn and other grain. The useful minerals found in the South such as iron, coal, talc, rutile, zinc, silica, kaolin and other clays granite, limestone and such other minerals and stones as have an active demand in commerce and art are shown.

There are displayed on the walls, on easels and attached to the railings dozens of agricultural, scenic and City views of the South, including panoramic views of cities, harbors, industrial and mountain scenery. All the views are large, all are colored and all especially selected to give a good idea of the attractions, resources and development of the southern states.
