## WOUNDED BOY BACK HOME FROM FRANCE

In a letter from Jule Snider, of Lyman, Washington, in which he advances his subscription the Journal, Mr. Snider tells us that he had two sons in the World War—Edgar who went into battle Sept. 26th, in the Argonne-Meuse advance and was under shell fire forty-five days. He was near Sedan when the armistice was signed. A Washington paper has the following to say of the other son, Raymond, which will, no doubt be of interest to friends of the Snider family in Jackson county, their old home:

Raymond Snider arrived home Thursday, after an absence of five years and says he is glad to get home. He is the son of Jule Snider and is well known here. He was among the first to enlist in the fight for his country, and enlisted in Missouri in the 35th division and in July this division occupied the Gerardmer sector with the French and it executed various raids, such as the Helderfirst and Mottle raids, upon which it was highly complimented and received decorations from the French. In September the division backed the First American Army during its operations in the St. Mihiel salient. In the end of the month the division attacked as part of the First army in the great Verdun-Argonne battle. It remained in battle five days, executing five separate attacks and losing over six thousand officers and men. It was here that Raymond was wounded. On September 26 two wounds in the right hand by machine gun and on the 27th he was hit by high explosive shell, receiving a wound in his leg and side. For 72 days he was confined to his bed at Bordeaux and in a hospital for nine months before being able to return home. Regardless of his many hardships Raymond is looking well and his many friends welcome his return.

The above list is subject to correction. If there should appear to be any error we would thank you to call our attention and we shall make public rectification.

The object of publishing this statement is to show those who are interested exactly how the Confederate Monument account stands, and open the way to speedy and complete settlement of the balance due the people who erected this splendid memorial to our immortal dead.

The collection of this balance was interrupted by the world war and the influenza epidemic. Some of those who are in arrears on subscription are prominent business and professional men, and some have died since the monument was unveiled. Any and all of them would have paid their balances on request, and it is no fault of theirs that these have not been paid. In fact it was the understanding with all subscribers who wished, that they could pay half of their subscriptions before the unveiling and the other half November 1, 1915, and September 18th, 1916, and still others not later than a year from this latter date.

This by way of explanation. We were exceedingly careful to credit every person at the moment and deposit the money, however small, in one or the other Sylva Banks, without delay.

Our figures outside of subscriptions and cost of monument, as totals, are some of them, approximate. If we could collect all the balances due in this list, provided there are no material errors, we could reduce the balance due, not figuring the interest, to about \$250.00. That would be pretty good and agreeable surprise.

The B. H. Cathey Chapter of the U. D. C.'s have most patriotically and voluntarily proposed to assume to raise the money to pay off this balance and free the Confederate monument of debt. We sincerely thank them.

We sons of Confederate veterans and all who lay this matter to heart, should do all we can to assist them. Prominent gentlemen of our town and county who are not

related either by blood or political affiliations to this cause have been among the most generous contributors; to them we are especially grateful.

It has been very pertinently and wisely suggested by some of our leading citizens and U. D. C.'s that we clear our Confederate monument of debt before we proceed with the noble task of erecting a suitable memorial to their heroic grandsons who fought for American and world freedom. JAMES H. CATHEY, Chairman Monument Committee.

NOTE:—In a personal settlement between W. L. Sherrill and myself I agreed to pay his balance of \$12.50. This accounts for his entire subscription appearing as paid in this statement, so far as he himself is concerned.

## HOMICIDE AT WILMOT

Conley Messer was shot and instantly killed Tuesday morning, near Wilmot, by Norman Turpin. Messer and Turpin are brothers-in-law, but it is stated that there has been trouble between them for some time, and Messer is said to have made threats against Turpin's life. The two met in the road about a mile from Wilmot and Turpin fired, killing Messer almost instantly. Both are well known men of that section of the county. At this time Turpin has not been apprehended, but it is believed that it is his intention to surrender himself to the authorities.

## SOY BEAN WORMS AGAIN STARTING ON RAMPAGE

ANOTHER BROOD AT WORK. Raleigh, N. C., Aug. 27.—Another generation of soy bean worms, the arrival of which was predicted by the entomologists of the Experiment Station, has now put in its appearance in the Belhaven section of the state reports Mr. R. W. Leiby, Assistant Entomologist of the Agricultural Experiment Station, who is located in a field station on Broad Acre Ranch near Terra Ceia where he is closely studying the worm situation. The soy bean worm it will be remembered has done injury in this state from Hot Springs, in the west, to the coast. It has been reported as injurious from Massachusetts southward.

The vast majority of the moths have now hatched from their cocoons in the ground. They may be seen by the millions in most any soy bean field, where they readily fly upon being disturbed. These moths are now laying eggs which should hatch within a week. The eggs are green in color and smaller than the head of a pin. They are laid on the under side of the leaves or on the stems along the hairs. The young worms are about an eighth of an inch long when hatched.

This brood of worms will be doing damage which is first seen by the farmer only after they are about half grown. Farmers are urged to be prepared to meet the attack as soon as they detect the young worms. A shaking of the plant will reveal their presence and the farmers are advised to examine their beans every few days for the presence of the worms. This brood can be exterminated in some fields and no serious injury will result if the beans are sprayed or dusted in time. Most of the real injury is done by worms which are half grown or older and the careful farmer who is interested in saving his beans will be on the watch for the first sign of worms.

Mr. Leiby believes that this brood will be heavy enough to completely defoliate beans within a shorter period of time than the last brood and that the beans will suffer more, because most varieties will not be putting out new foliage as they did following the attack of the last brood. Beans which are unable to maintain their foliage will die before the seed is mature. This has been demonstrated by the past brood of worms on such early maturing varieties as Black Eyebrow, Ito San and Virginia.
