Raleigh, April 3.is the time to plant the vegetable garden and while it is hardly we ary to re-, fact, still mind most people of) specialist Frank E. McC. d Peart for the State · to make necessary to ur their land per. than in the present a seasonable is possible to 1 to the house etables direct from the gorden every

Mr. McCall states that early or quick maturing vegetables like radish early peas, beans, leaf lettuce, spinach, beet and early carrots may planted at regular two weeks infervals through out the entire spring and on into the early summer. This will insure a continuous supply until midsummer, at least.

Right now, Mr. McCall states that plants of cabbage, cauliflower, head lettuce and early celery as well as the seeds of such long season crops like parsnip, parsley, salsify and onion may be put out. In planting any of the garden crops, it always pays to use the best varieties and touse only good seed.

"He that planteth a tree is a servant of God,

He provideth a kindness for many generations,

And faces that he hath not seen shall bless him."-VAN DYKE

Drawin_ Territory of Hanover, counties, 1 sociation la ed in Wil: growing of feed affs co poultry prod and the feed tugis. by saving said reports Miss ribrence deffress, Home Agent in New Hunever County.

A recent report from Mooresville Cooperative Creamery shows that it distributed around \$150,00 to its farmer patrons last year. How much plant food would a cotton crop of this value have removed from that territory, asks the dairy farming workers of the extension service.

Agricultural paper may run for nine months according to section 36 of the North Carolina Banking Law. Farmers entitled to credit might ask their bankers about this.

The choice is largely up to you. If your blood lacks red corpuscles, you're going to be fagged and dragged out, you're going to lack "pep," to look sallow and unhealthy, to grow old before your time.

> SWEET POTATOES WILL SPROUT IN STORAGE

Whittier, Mrs. G. C. Turpin, Gay.

Raleigh, April 3.—These warm sunny days when the temperature begins to run high will cause sweet potatoes now in storage houses to sprout unless they are properly handled, says R. F. Payne, extension horticulturist for the State College and State Department of Agriculture. Mr. Havne states that when the outside temperature is over 50 or 55 degrees, all the windows, doors and ventilators of the storage house must be kept closed. When the temperature in the house runs over 55 degrees it should be cooled off at night or during the day when the temperature drops by opening up the house and letting the cool air come in. Then when the temperature has aga 1 dropped down to the desired level, the house should be closed tight y to keep the thermometer at this

Mr. Payne states that the storage house should be so built that it is insulated by .he dead air space between the walls, and will remain cool despite the fact that the outside temperature is warm. He recommends that this cooling method be used often enough, however. to keep the house at the desired level of 50 degrees.

Another thet of inm riance, is to gree the ten layed. 2 petat es from the home since the first sprontoccurs in the crates at the top. to the temperature is from 5 to rioss warmer than near the ". We leavne states that careful and be given to this a to storage home owners since Thele save them considerable a deir stored roots.

HOOSIER

A Kitchen Planned to Save Time, Work and Worry

This advertisment reproduced from The Hoesier Manufacturin Company's ad in April 14th Saturday Everlag Post, Andl The Contr. Gendleman. Del the Apriltisan of Ladies Herre Journal, Good Housekeeping and dictorial Review.

How often do you walk all the way across your kitchen to get a little thing like a spoon or a colander? How long do you stand at a worktable that is too high or too low for your comfort?

No doubt your kitchen, on the whole, is well planned. In its big details it is

But it's the little aggravations that wear one out—and two million users say the t HOOSIER is the only kitchen convenience which gets all the little details right. C asequently, HOOSIER gets rid of those nagging aggravations which pile up on each other until they spoil your day and make you all worn out by night.

HOOSIER

-Planned By Women For Women

Every suggestion ever made for the improvement of a kitchen cabinet has been tried out on the HOOSIER-the best accepted, the rest rejected.

> there is ne kitchen conventhat will do so much to save k and worry.

By all means, come to our store and or easy kitchen work can be

il show you how to get cut of i chen early-and in as good firits as you are when you enter it.

There Is No Substitute For The HOOSIER

HOOSIER'S most important laborsaving conveniences are protected by patents. Therefore you cannot buy or build anything that will take the place of the HOOSIER...And because the cabinet is built by the largest firm specializing in labor-saving conveniences for the kitchen, you cannot secure even a passable substitute for the HOOSIER at anything like HOO-SIER'S mcderate cast.

No need to go on doing your work the hard old-fashioned way when our easy terms are available.

DO YOU INCREASING your cost of Portland Cement

N unprecedented demand for Atlas exists right now - a demand that cannot be met unless the empty Atlas bags now in users' hands are returned. In the course of a year close to \$5,000,000.00 worth of bags are needed by Atlas. This would be a heavy burden on cement users if the bags were not returned and reused, so cutting down the number of new bags needed.

Return your empty Atlas bags promptly to your dealer. Help him, and help us, keep Portland Cement the cheapest of all manufactured products.
