DOES HOUSEWORK LIKE IT WAS PLAY

Mrs. Little Declares Tanlac Restored Full Strength After Overcoming Indigestion.

"Since taking Tanlac my troubles have left me, and I never tire of telling about it," declares Mrs. Johanna Little, 3032 N. 17th St., Kansas City, Mo.

"My food often caused me much distress from gas, sourness and heartburn, and I scarcely ever wanted to eat. Headaches, biliousness and pains in my back kept me in hot water, and I hardly ever got any restful sleep. My nerves were excited and I was so run down it was all I could do to look after my housework.

"I searched the city for the right medicine, and consider it fortunate that I found Tanlac. Indigestion, sleeplessness and nervousness never bother me now. I can do my housework like it was play, and am strong and happy. Tanlac is simply grand."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.—Advertisement.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected.

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview on the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease. Dr. Kilmer's Swamp-Root is on sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

Optical Illusion.

Motion pictures are in reality a combination of still pictures. The first picture of the automobile shows the spokes of the wheels in one position. If the next exposure of the film were made when spoke number one had advanced far enough to be in the position of spoke number two, the picture would show no motion, as spokes are identical. If spoke number one had advanced less than half way to position of spoke two, the forward motion would be noticed. If, however, spoke one advanced more than half way, to the observer it would have the effect of spoke two moving backward, as that distance would be shorter and the apparent motion would be in that direction.
