LIVER REGULATOR**  
for BLOOD-LIVER-KIDNEYS  
**The BIG 25¢ CAN**

The Public Demand.  
"Aren't you going to make a speech?"  
"Not if I can avoid it," answered Senator Sorghum. "Why should I risk saying something that might make me unpopular? All the public appears to ask at present is that I keep quiet and be photographed."

**Hall's Catarrh  
Medicine** is a Combined Treatment, both local and internal, and has been successful in the treatment of Catarrh for over forty years. Sold by all druggists.  
F. J. CHENEY & CO., Toledo, Ohio

The Age Limit.  
"So old Witherbee is to be married again. Is the bride very young?"  
"Young enough to know better."

**Is Your Work Hard?**  
Is your work wearing you out? Are you tortured with throbbing backaches—feel tired, weak and discouraged? Then look to your kidneys! Many occupations tend to weaken the kidneys. Constant backache, headaches, dizziness and rheumatic pains are the natural results. You suffer annoying bladder irregularities; feel nervous, irritable and worn out. Don't wait! Use **Doan's Kidney Pills**. Workers everywhere recommend Doan's. They should help you, too. Ask your neighbor!

**A North Carolina Case**  
D. L. Bryan, 11 First St., Sanford, N. C., says: "My kidneys got out of condition and I had to get up at night to pass the secretions, which were highly colored and contained sediment, besides burning in passage. When I bent, sharp pains shot through my kidneys and it hurt to straighten. Doan's Kidney Pills soon rid me of the trouble."

What They Missed.  
Two newsboys went to a performance of "Hamlet." In the last scenes, after Hamlet had killed Laertes and the king, and the queen had died of poison and Hamlet of a poisoned wound, one of the newsboys exclaimed: "Golly, Jim, what a time that must have been for extras."

A Safe and Sure Laxative—**Brandreth Pills**. One or two taken at bed time will keep you in good condition. Entirely vegetable.—Adv.

Too often bad motives are attached to good acts.

**Dancing on the Rocky Shore of Lake Erie**

Pupils of a Cleveland dancing school learning poise and grace under open skies on the rocky shore of Lake Erie

**Ordination of Heroes of the War**

At the beautiful chapel of the Seminary of Saint Sulpice at Issy, Cardinal Dubois conferred the sacred orders on sixteen priests, of whom two were Cistercian monks of the primitive observance at Viroflay, and on six deacons. All were former combatants in the World war, including one officer and three knights of the Legion of Honor, two with military medals and two with war crosses.

**Clean Living for High School Boys**

The H-Y club is an organization of high school boys of whom there are said to be over 800,000, conducted under the direction of the Y. M. C. A. The members have pledged themselves to clean living, clean speech, clean athletics and clean scholarship. Photograph shows members of the Tulsa, Okla., unit kneeling in prayer on entering the order.

**Needle Gun Used by Beer Dopers**

Beer dopers of Chicago have been using needle guns, one of which is here seen in the hands of a police lieutenant. With this instrument the dopers inject ether into near-beer, giving the beverage a kick that is not only powerful, but often fatal to the drinker.

**HONORED FOR BRAVERY**

For bravery displayed in risking his life to save two comrades in Lake Champlain, Walter E. Trimble of New York has received from the Treasury department at Washington a gold life saving medal of honor.

**THE GRACE COOLIDGE**

Named after the first lady of the land, the loveliest bloom on display at the chrysanthemum show in the greenhouses of the Department of Agriculture in Washington is "Grace Coolidge" and is being viewed by hundreds of persons daily. The bloom is an especially large one of creamy white.

**FLAG LADY HOME AGAIN**

Mrs. Charles A. Robinson, senior national vice commander of the Women's Relief corps, National Disabled Soldiers' league, Washington, D. C., known as the "Flag Lady," photographed on her return from a tour of Europe. She was received by the queen of Belgium to whom she presented a silk flag.

"Men that hazard all  
Do it in hope of fair advantages."  
—Merchant of Venice.

When a man invests his money in government bonds, he is assured of both interest and capital. When he invests his money in a business enterprise, he is assured of neither. Statistics are said to show that 95 per cent of all business ventures fail within a few years of their launching. It is certain that far more men fail in business than succeed.

The economists speak of the man who takes the risk in a business as an entrepreneur; and they acknowledge that he should be allowed not only a fair interest on the money he has invested in an enterprise, but also a fair gain to pay him for the risks he has taken—the greater the risks the greater the gain. People who figure that investors should be satisfied with the interest alone, and there are many of them, show themselves ignorant of the fact that Shakespeare here points out—that men will not risk all they possess without the hope of advantage.

It is of importance to us that men should be willing to risk their money in industrial ventures. We have our railroads, our telephones, our automobiles, and our moving pictures as the result of men's willingness to risk their private fortunes. Those who advocate state ownership for all industries rarely stop to consider who would bear the risk of undertaking new enterprises if the state owned the industries. Certainly the government is not supposed to take risks with the money of its taxpayers. It is equally certain that new enterprises cannot be undertaken unless some one bears the risk. A man with an individual fortune may risk it as he sees fit; herein lies the great value of private wealth.

Just now there is an ever-growing tendency to limit the advantages that a man may gain by taking great hazards. Such limitation is folly when carried far enough to keep men from taking the risk in new ventures—the acme of statesmanship is to determine the lowest rate of gain that will induce private capital to assume the risk in new enterprises.

"Carefully then were covered the embers that glowed on the hearthstone."  
—Evangelina.

When the modern householder covers his fire at night, it is to keep the hot-water pipes from freezing during the night or to keep the house from becoming unduly chilly overnight. When the farmers of Grand-Pre covered their fires at night, it was to save themselves much trouble the next morning with flint and steel and tinder. Lighting a fire in those days was no simple matter of lighting a match—it was a slow, laborious process.

Countless centuries ago man discovered that fire would keep him warm in cold weather, would make his food easier to chew, would help him in flaking stone for axes and spearheads and would aid him in countless other ways. In the very earliest days men had to depend on lightning for their start of fire—hence it was perfectly natural that the Greeks should have believed Prometheus stole fire from the gods and gave it to man. When the lightning struck a tree and started a forest fire, our primitive ancestors no doubt hunted around in the wake of the fire for smoldering stumps and logs. These pieces of smoldering wood they probably carried to their caves and used to start fires that were kept alive for weeks or months at a time. If through carelessness or accident the fire was allowed to go out, the people of that early day were compelled to wait for another lightning storm to get a fresh supply of fire.

Later man discovered that by rubbing two pieces of wood together very briskly he was able to start a fire. This marked a tremendous step forward in the history of fire making, for it made men independent of lightning storms.

Later still he discovered that by striking a piece of iron or steel against flint he was able to strike fire that could be caught by a bit of tinder if he were skillful enough. He also discovered that it was possible to start a fire by focusing the sun's rays through a piece of glass. Fire could not be started with a burning glass except on sunny days, and lighting a fire with flint and steel was tedious business; but both methods were much simpler than the method that had preceded them.

The matches that are in use at the present day are a comparatively recent invention, made possible by advancements in chemistry. Up until the days of the Civil war and for a quarter century afterwards they were looked upon as something that must be used sparingly—and the housewife who used matches to light a lamp when she had a fire burning at which she could light a splinter or a bit of rolled paper and from that light the lamp was regarded as extravagant.

**WRIGLEYS**

Take it home to the kids. Have a packet in your pocket for an over-ready treat.

**After Every Meal**

A delicious confection and an aid to the teeth, appetite, digestion.

Good to the last drop

There is something about a man's humor that tells you on sight what kind of coffee he's had for breakfast.
