SENATOR CUMMINS	HARRY HOUDINI
SENATOR MITCHELL	JOSEPH PENNELL

OIL'S WELL!

Faith without works is worth little, so are pledges without action. The business-like farmer will begin now to plan his crop acreages for the coming season

The best New Year resolution for the North Carolina farmer this year is one pledging himself to produce his own food and feed crops.

Tom Tarheel says the best Wife-saver is not some highly advertised bottled concoction but is running water in the house.

A difference of over 1,000 pounds of legume hay per acre was secured where land was limed as compared with a similar unlimed area in tests made by North Carolina farmers last season

Five demonstrations with soybeans showed a yield of 4,606 pounds of hay per acre where one ton of lime was used on the land as compared with 3,822 pounds of hay per acre where no lime was used.

The farm population of North Carolina in 1925 was 1,446,881 persons. Of this number 937,001 were white people.

WAS DOWN IN BED WITH LUMBAGO

Went back to work after three days of home treatment

C. L. Normandy, a civil engineer living at 234 West 9th Street, St. Paul, Minn., was taken with an attack of lumbago and for one week could not move in his bed.

"A friend told me to use Sloan's Liniment and I got a bottle. After using it one day, I was able to walk about the house. After three days I was able to go to work, and now I am as well as ever. I would not be without Sloan's Liniment if it cost \$5.00 a bottle. It is a sick man's friend."

The reason that Sloan's gives such remarkable relief is that it gets right at the cause of the pain. It stimulates the circulation throughout the place where the pain is, and clears out the germs that are causing it.

Right away you feel relief. The pain stops, and soon you are fit as ever. Get a bottle today and have it on hand. All druggists—35 cents.

Sloan's Liniment
KILLS PAIN

J. B. Ensley & Son
Feed, Flour and Groceries

Our customers need never worry about quality—flavors or prices. You are never taking a chance on any article—we never substitute something "just as good" for the best.

We have alfalfa hay. Buy it for your milch cows. One pound of alfalfa is worth two or three of Timothy, as a milk producer.

We deliver in the city and will take orders over the phone—number 136.

GOOD NEWS.
CANALS, CROPS, PROSPERITY.
WE ARE HOMOGENOUS.
ALL ALIKE.

It's really a prosperous country we live in, and the prosperity has only commenced. Arthur Reynolds, able Chicago banker, says our prosperity will last through 1927. It will also last through 1927 and beyond, if we give it a chance, really, work and do not cheat each other too much.

Revised Government reports on crops put corn for this year at two billion six hundred and forty-five million bushels, wheat at eight hundred and thirty-two million three hundred and five thousand bushels—and forty million bushels of rye, forty-one million bushels of rice, eighteen million six hundred and eighteen thousand bales of cotton, thirty-three million nine hundred thousand boxes of oranges, etc., and you have a slight idea of what prosperity means.

And unlike oil, those crops are not exhausted, but go on forever, increasing. Land in France planted to wheat for centuries produces more bushels per acre now than it did 200 years ago. The pity is that when farmers have big crops they get small prices. Combination sales and voting could help that, but farmers do not yet know how.

Other good news for all Americans is this: "The lake cities will be connected with the Mississippi, the Gulf and all ports of the world by navigable waterways through legislation that should pass this year."

Winter. And a canal from the lakes to the Atlantic also seems probable if an agreement can be made with Canada for joint use of the St. Lawrence.

The right plan would be an all-American waterway from the lakes through New York State, and that will come. But it would cost five or six hundred millions more than the low cost of the St. Lawrence canal, which probably will come first.

Farmers are deeply interested in these canal projects, for which Secretary Hoover deserves greatest praise. He is a worker. The canals will cut an average of twelve cents from the freight on export wheat and add twelve cents to the farmers' price.

Harnessing the Colorado River seems not far away, thanks to a number of earnest men, including Senator Hiram Johnson, Secretaries Work and Hoover, and others. The remaining difficulty seems to be arranging an agreement between California and Arizona. The dam would be in Arizona, a great part of the power and irrigation would be used in California. The prosperity of one State is reflected in all States. California cannot thrive without benefiting Florida and Maine.

Arizona, the great State of copper, cotton, citrus climate and the Colorado, will prove itself the State of brotherly conciliation. The thing designed is to use the country's wealth, water and power especially, and thus build up the entire nation. Arizona will not unwisely withhold from development and use that which, at the moment, she herself cannot use.

This is written on the writer's eleventh trip across the continent in fourteen months. The oftener you cross, the more uniformity of life and manners in America amazes you.

The young man in semi-balloon trousers, left in New York, you find again in Chicago, Kansas City, Topeka, Gallup, Albuquerque, Barstow and tens of thousands of him in Los Angeles.

Travel a short distance from the shores of Brittany to the mountains of Auvergne, in France, and you find language and clothes changed completely, also interests, habits and manners.

Here, from Miami to Portland, we all know the same baseball and football scores, see the same moving pictures, wear the same clothes, get about the same prices.

About Your Health

Things You Should Know

by John Joseph Gaines, M. D.
DRIED FRUITS

Winter now being on, the human family may well consider the use of the best obtainable fruits for dietary. Fresh, native fruits are difficult to obtain at this season.

Fortunately, we do not need accept inferior substitutes; we have in dried apples and peaches, as well as prunes and apricots, not only equal, but actually the superior most of the fresh fruits that come to our tables. As an article fruit diet, there is nothing finer than the old-fashioned, home-dried apple, which may be stewed, or partaken of three times a day, to the utmost benefit to the system. Preserved fruits, which are not so scrupulously sugared, are not difficult of digestion. The "dried apple pie" seldom heard of more, is far safer to indulge in than many of the factory-made delicacies which are incorporated too many of the fashionable pie today.

Drying fruits, especially in the sun, does not remove anything of value from them. The watery content of the apple is taken away by evaporation in drying; the vitamins are left, along with the acids and bases peculiar to the variety of fruit dried. People who eat dried fruits in abundance are seldom afflicted with constipation, indigestion, ulcer of the stomach, many nervous disorders—a statement which does not hold good when excesses of fresh fruit are taken.

Dried fruits are in no way detrimental; they are a time-tested, proven, preventive of disease. They have never been called to the attention of a patient suffering from an over-dose of stewed, dried fruits.

DANGER SIGNALS

A good cold weather starter now more dependable than ever

Probably no single feature of Dodge Brothers Motor Car has been more widely talked about and commended than the power and promptness of the starter.

The new two-unit starting and lighting system now advances Dodge Brothers leadership in this important respect still further.

There are now no moving starter parts when the car is in motion—no starter chain—no noise—no wear. The new starter is even more DEPENDABLE than the old, and far simpler and more compact in construction.

Many other major improvements have been added during the past twelve months, all vitally affecting performance and increasing value far beyond the apparent measure of current Dodge Brothers prices.

Sedan	\$1005.50
Coupe	\$ 948.50
Touring Car	\$ 897.00
Roadster	\$ 895.00
