**106—BUILD IT**

Once more this paper feels impelled to call attention to the necessity, the urgent necessity, of the immediate surfacing of Highway 106. The few miles from Cashier's Valley to the South Carolina line is naturally and logically a part of the state highway system. It should be taken over and accepted as such, now. The highway commissioner of this district has promised that this would be done. It should be accomplished without delay.

With this short stretch added to Highway 106, it becomes a main trunk link of highway from South Carolina, through the mountains and the Park, to Tennessee; and is of great importance to the state and the adjoining states.

This highway is the route over which the products of field and forest of some of the fairest lands of all Western North Carolina must come to market. At present the people are blocked for months during each year, and the wheels of commerce stopped, to the great injury of Jackson county, of Sylva, and of the whole of this end of the state.

This highway is one of the greatest of all the scenic highways of Western North Carolina and traverses a country of incomparable beauty. It is of importance to the state as a tourist route.

This highway is the only means of ingress and egress to the Cullowhee State Normal School; and the law provides that the highways must be constructed to the state institutions.

The people of Sylva and Cullowhee townships graded the present road from Sylva to Cullowhee, before the state construction started. The people of Jackson county paid half the cost of grading from the Forks of Tuckasee to Glenville. The County graded the road from Cullowhee to the Forks of Tuckasee. The county loaned the state highway commission the funds with which to surface the road from Tuckasee to Dick's Gap; and there should be sufficient funds left from the loan to complete that surfacing and a considerable sum left over to apply to the rest of 106.

Year in and year out, the people of Jackson county have been hoping, working, expecting that 106 would be built and become a real highway. It seems that they have exhausted every means at their command, without taxing Jackson county to the point of unreasonableness, to secure this road.

The highway commissioner for this district promised the people of the county, publicly, that "if there was another bond issue, and if he remained of the highway commission, that he would see to it that 106 was finished all the way, with all haste." Doubtless he has no other intention than to fulfill his promise. The people expect it.

It is now up to the highway commission. The road must be built. To fail to finish it before another winter comes would be tragedy. It can be done.

**CREAM A HALF DOLLAR THIS WEEK**

C. W. Tilson

The Chicago Standard price for high quality butter is a half dollar per pound this week. This price is the price paid to our farmers by Carolina Creamery for butterfat in good clean cream not over 4 days old delivered to the creamery manager at the Sylva station in back of Freeze and Fleeman's store building. Mr. Wyman, manager of the Franklin Branch of the creamery will get cream at the Sylva Station on Wednesday afternoon 3 to 5 and Saturday morning 9 to 11 o'clock.

Folks, the Asheville Creamery has put the best cream market in the state at our door in our own county. The manager will deal direct with the farmers and cream producers will have no middle man services to pay for. Our farmers are getting the same price per pound as Macon farmers get. So we have a cream market just the same as a creamery here, and the creamery is coming as soon as our volume is sufficient to operate a branch plant. So it is up to our farmers to get busy and produce the volume of cream not only to maintain a central station in the county but also bring the creamery plant itself to our county. You will see from the Carolina Creamery ad in this issue that they have established the market for us, so it's left for us to take our part for our own interest.

**PRAYER MEETING**

Prayer meeting was conducted Wednesday evening by Mr. Roberts and his ball boys. The service was very interesting both from a scientific and religious standpoint. The responsive chord of love, both in God and nature was stressed. The remarks were based upon the first chapter of Genesis.

A large number was present and we hope these beautiful evenings will inspire more of the town people to come out.

B. Y. P. U. at 6:30 Sunday evening.

**A Wagon What Am**

We have just received from the Geo. E. Nissen Wagon Company, a 3x10 and 3 1-4 x 10 Nissen Wagon gears, which were made up special for us. We feel that our experience in the wagon business has given us a knowledge sufficient of wagon construction to specify just the wagon that is most practical for this particular section.

The George E. Nissen wagon has long since been considered the lightest draft wagon on the American market. With the changes that we have made in construction of this wagon, makes it now one of the best ironed and strongest built wagons that ever came to this section. We believe that every one in the market for a wagon should see our special Nissen before buying. Our prices are as follows: One-fourth cash with order and balance in three equal payments or, two, four and six months:

- 2-3-4 gear only ..... \$115.00
- 3 x 10 gear only ..... \$120.00
- 3 1-4 x 10 gear only ..... \$125.00
