

RECEIVE TUBERCULOSIS SEALS

20,000 tuberculosis Christmas seals have been received by Mrs. J. C. Allison, chairman, for the Twentieth Annual sale in Sylva and throughout the state.

The good that the seals do last throughout the year, and render possible the carrying on of the fight for curing and preventing tuberculosis and other diseases.

Just any kind of pecan tree is not suited to North Carolina conditions. Only the best will grow and yield well.

Forty cars of demonstration fed hogs have been shipped by farmers of Chowan County this year. Plans are underway now to increase these shipments next year.

Magnesium limestone puts quality into the tobacco crop and increases the yield per acre.

Good beef liver, properly cooked, will help control anemia. The food contains iron and other minerals as well as vitamins.

MUST FEED COWS TO GET PRODUCTION

Raleigh, N. C., Nov. 10—If the dairy industry of North Carolina is to profit most from the introduction of pure bred cows and bulls brought in by farmers in recent years, the off spring from these animals must be well fed.

"In the three dairy improvement campaigns conducted in this state during the last three years about 850 pure bred, well selected dairy bulls have been placed on that many farms," says John A. Arey, dairy extension specialist at State College. This does not include a number of other fine animals brought in through private sales. If the dairy industry is to derive any great benefit from the use of the animals, their offsprings must be well fed. This is true from the time the calf is dropped until it has passed its usefulness as a milk cow. Many heifers sired by good bulls have been disappointments and have been stunted in growth and production by under-feeding when they were young."

Mr. Arey states that good breeding is very important in building up the milk and cream production of a herd, but it is ineffective unless the good breeding is accompanied by good feeding. Underfeeding, he states is largely responsible for dairy cows of this state averaging only about 150 pounds of butter fat a year. This quantity of butter fat selling for 45 cents a pound brings only \$67.50 which will not pay for the feed the cow eats. In many cases, the production may be increased from 150 lbs. to 225 lbs. by liberal feeding. At 45 cents a pound the 225 pounds of fat will bring \$101.25 which is enough to give the farmer a good profit for all the feeds he produces on his farm and feeds to his cows.

Those animals which will not produce as high as 225 pounds of fat when well fed, should be culled from the herd and sold to the butcher; but no cow should be so condemned until she had had a chance under good feeding and care, states Mr. Arey.

TRUSTEE'S SALE

Notice is hereby given that under and by virtue of the power of sale contained in a certain Deed of Trust executed by Joe Love to L. C. Hall, trustee, dated the 11th day of June 1925 and registered in the office of the Register of Deeds for Jackson county, North Carolina, in Book 98 at page 38 et seq; and default having been made in the payment of the debt therein secured, and the holder of the notes secured thereby having made demand upon the undersigned that he execute the said Deed of Trust and sell said property for the payment of said notes, interest and cost.

Now therefore, on Monday the 5th day of December 3:00 o'clock, P. M., at the Court House door in the town of Sylva, Jackson County North Carolina; the undersigned will offer for sale and sell at public auction, for cash, the following described property, to-wit:

Lot number Four, in a plot as surveyed by J. R. Ryan, near the Colored School, on the Southeast side of Scott's Creek, in Sylva Town ship, Jackson County North Carolina, and being the same property conveyed from D. M. Hall and wife Edith Hall, and T. E. Reed and wife, Bertha Reed to Joe Love as recorded in the office of the Register of Deeds for Jackson County, North Carolina, reference to which is hereby made This the 5th day of November, 1927 L. C. Hall, Trustee
