

JACKSON CO. JOURNAL

DAN TOMPKINS, Editor

Published Weekly By the JACKSON COUNTY JOURNAL CO

Entered as second class matter at Sylva, N. C.

Hot Dog! a real country club and areal golf course!

It is not desired that any loosening of the divorce laws be made in this state. North Carolinians like to be reasonably sure who their husbands or wives will be when they get home.

The trouble about providing too many war dogs is that dogs have started many a first class fight.

A doctor in Wales points out the dangers of kissing; but he didn't say a thing about the real serious situations that such a habit has caused, throughout the history of the race.

Of course we know nobody in Raleigh will be greatly influenced by our editorial opinions on the Australian ballot; but that's the way we feel about it. Some day, though, the State will come to it.

Dairying, stock raising, sheep raising, market gardening, haying, horticulture, and now back to tobacco again. Thus Jackson county is building up an agriculture that will be on a big paying basis in a few years. It is well to remember the old adage, however, which says: "make haste slowly."

We'll bet dollars to doughnuts that there are a lot of folks in North Carolina who are "whooping it up" for the passage of the Australian Ballot law, who can't tell you a single provision of the pending bill.

Necessity is other things besides the mother of invention. We have traded the fine timber of Western North Carolina for a bare living for a few years. Now, of necessity, we must turn back and try to get farming again on a paying basis.

Governor Gardner is a smart and a popular man; but even he will find that it is an almost impossible job to make anything out of a politician except a politician, regardless of which party he may affiliate.

LOVE ME LOVE MY DOG

The Franklin Press has this to say about Representative Smith's dog and sheep bill:

"Jackson county's representative in the general assembly has introduced a bill which would permit the county to loan not exceeding \$250 to any one farmer for the purpose of making improved pastures for cattle and sheep. This bill requires that all dogs be kept confined at night so that the sheep may escape being killed by the dogs. Macon county has had such a dog law for several years, but it amounts to nothing. Kill a man's dog and you lose his vote, sheep or no sheep."

IN MEMORIAM

W. ALBERT BROWN

Whereas, it has pleased our Heavenly Father in his infinite wisdom to call from labor and our midst to that Celestial Lodge above Brother W. A. Brown.

Therefore, be it Resolved, by East

La Porte Lodge No. 358 A. F. and A. M.

First, That we bow our heads in humble submission to the will of him that doeth all things well.

Second: That we recognize in the passing of our good friend and brother that the Lodge, Church and the Community has lost a very valuable Jewel, but our grief is sweetened by the memory of a life that so exemplified the high ideals of our great order.

Third, That we extend to his loved ones left behind our sincere sympathy and commend them to Him who said: "I Am the Resurrection and Life."

Fourth, That a copy of these resolutions be sent the bereaved family a copy sent to The Orphans Friend and Masonic Journal, and a copy spread on the minutes of the lodge, and one copy to the Jackson County Journal.

J. H. Middleton,

E. P. Wike,

F. G. Brown,

Committee.

GREEN'S CREEK CHURCH GROWS

The Green's Creek church having asked me to write a letter to The Jackson County Journal, and the Biblical Recorder and give a brief history from its origin to the present. Would say that the Greens Creek Baptist church was organized in April, 1927, just after the Rev. R. N. Deitz had held a successful revival meeting in the school house.

It was organized with 46 charter members who called for their letters from the Old Savannah church and it has held its meetings in the school house until in the spring of 1928 with R. N. Deitz for pastor until July 1927, with the exception of 1 year when the church elected Rev. R. W. Green as pastor.

In the Spring of 1927 Rev. R. N. Deitz drafted a plan for a church and had the framing and rough material sawed and a building committee appointed and in July the church elected Rev. G. C. Snyder and he had a finance committee appointed and a site bought for \$75 and most everybody went to work to get the church up. Messrs. Lee, Ham Estes and R. H. and Mack Hall and A. B. Ashe, carpenters from Old Savannah each gave us several days work on the church for which we all wish to give them our sincere thanks.

We had quite a lot of help from outsiders for which we all feel very grateful.

Especially Prof. R. L. Madison for his liberal contribution and for the encouraging speech he made us. Long may his name live in the history and hearts of the good people of Jackson county.

We now have about 90 members, and our Sunday School has been an evergreen Sunday school since our organization.

Prayer meeting has been almost an evergreen meeting since its organization.

We have some 8 or 10 members who will lead a public prayer and make public talks.

We have our church completed now except painting and seating.

We have temporary seats at present. We have it all paid for but \$85.

We have had revival meetings from time to time giving us some additions to our church. The last being held last April by Rev. G. C. Snyder and Rev. R. N. Deitz, with an addition of 9 baptisms.

So, again thanking everybody that helped us and asking the prayers of all Christians who may read this, I beg to remain

J. C. Reed.

880,000,000 HOT DOGS

ONE MORE MIRACLE

WILLIAM H., AGED 70

ELECTRICITY IN THE HOME

Chicago packers say 880,000,000 sausages, commonly called "hot dogs," were eaten last year.

Properly made, well cooked, eaten at regular hours, and chewed slowly to avoid swallowing small pieces whole, the "hot dogs" are good for men. But, eaten between meals, haphazard and rapidly, they contribute to the 50,000,000 cases of American dyspepsia.

A child in Chicago, five years old, born without feet, will be enabled to walk, run and play by surgeons operating on the muscles of the upper leg.

That is an interesting miracle, and there are many others in modern science. Those born deaf and dumb, that never hear a sound, learn to speak and understand the speech of others. With imagination's power, never having seen the earth or the sun or the sound of a friend's voice, they are able to understand beauty and friendship.

That answers those who ask: "Is there really such a thing as a soul?"

William Hohenzollern, once Emperor, is seventy. He looks well, but disillusioned, wears a full beard, mustaches no longer waxed or turned up at the point.

He will celebrate by publishing a book called "My Ancestors." It could be interesting, going back to the early money-lending family of East Prussia that got its name from high interest rates. But it's hard to write impartially about your own people.

William decided that some things were wrong in the Hohenzollern family, and blames its troubles, passion, sudden rages, bad temper, etc., on a woman, Maria Pawlowa, Russian by blood, Hohenzollern by accident of marriage. That reminds you of Adam blaming Eve.

William says Maria was "the villain of my family." His predecessor, Frederick the Great, would know better. Maria Pawlowa, because she was wild, violent, ungovernable, may have given Prussia's ruling family its genius.

Use of electric machinery in the home, sweepers, washing machines, fans, irons, mangles, exercising apparatus, has increased enormously in the past year.

L. J. Horowitz, head of Thompson, Starrett, biggest building concern, announces privately, a new electric cooking stove that will be prepared as cheaply as a gas stove. That will interest General Electric and Westinghouse.

A bill in Indiana's Senate suggests "flogging for male criminals who carry weapons while committing crime."

Strokes would be "administered to the bare back, well laid on, and punishment graduated up to SIXTY LASHES."

Why not have criminals, operating with or without weapons, put to work for ten or twenty years. Pay them for work, let them accumulate money, and, except in cases of murder, release them after time convinced them that work and saving are worth while.

China, with almost as many problems as she has inhabitants, decides to cut her army in two, leaving ONLY 715,000 fighting men to be fed by others. ONLY 40 per cent of the nation's total revenue is to be spent for military expenses.

If those 715,000 men could be put to work raising food for the starving, and 40 per cent of national revenue devoted to the same starving, that would probably please the ghost of old Confucius.

By Farmer Smith.

"What are you children all dressing up for this morning?" asked Mrs. Rabbit, when she peeked into the children's room.

"Why, Mother dear, this is Lincoln's Birthday. Have you forgotten? I am surprised!" answered Bobbie. "Excuse me," said Mrs. Rabbit. "You see, I have so many things to think of that I forget, while you children have only your school."

The bell in the Rabbitville school house was still ringing as the bunnies scampered out of the house all dressed up in their Sunday-go-to-meeting clothes. On the way they were met by Tessie Squirrel, who was also arrayed in her "bestest" outfit.

"Are either of you going to speak a piece?" asked Tessie, almost out of breath from running.

"No-o-o," hesitated Bobbie. "Are you?"

"Yes, but it is very short," replied Tessie.

"What is it?" asked Billie, all curiosity.

"Wait and you will get a great surprise," said Tessie, as they went up the Rabbitville school steps.

The sun was shining full in the school room when the exercises began and when all those who had to speak pieces were through, the teacher said: "We will now hear what it was that made Abraham Lincoln great. Tessie, will you tell us?"

Tessie Squirrel walked upon the platform amid a profound silence and said:

"The thing which made Abraham Lincoln great was his LOVE."

And as the bunnies went home, Billie said to Bobbie: "Let's tell Mother what made Abraham Lincoln great."

"Yes," replied her brother. "I know now what makes Mother great!"

Unquestionably the Greatest Curtain Value Ever Offered!

Beautifully Made Curtains at an Amazingly Low Price to Introduce CHARLES WILLIAMS Wonderful Values to You...

38 T7320—Thrifty housewives—just see what you get—beautiful three-piece curtains that will cost you only 50 cents for stylish drapery for an entire window. Two complete sets for only a little more than you would pay elsewhere for one set. These curtains are made of cream color Voile and have popular colored scalloped valance and tie backs. Rayon stitching to match valance finishes all ruffles. Each curtain is about 20 in. x 21/6 yds., separate valance 50 in. wide.

Cream color with rose, blue, gold or green trimming. Order by No. 38 T7320. Send in your order for these curtains and get our big new Style Book Free. It is filled with other big bargains.

2 complete sets for \$1.00

—and we pay postage

There are many reasons for the ease of steering the new Ford

THE new Ford is exceptionally easy to steer because of the well-proportioned weight of the car, the steel-spoke wheels, the co-ordinated design of springs and shock absorbers, the size and design of the steering wheel, and the simple mechanical construction of the steering gear.

The Ford steering gear is of the worm and sector type used on high-priced cars and is three-quarter irreversible.

In simple, non-technical language, this means that the car responds easily and quickly to the steering wheel, yet there is no danger of the wheel being jerked from the hands of the driver by ruts or bumps in the road. A light touch guides the car, yet you always have that necessary feel-of-the-road so essential to good driving.

Strength of materials and careful workmanship give unusual stability to the Ford steering gear and housing.

The steering worm, for instance, is splined to the steering worm shaft and is stronger, of course, than if a single key were used to hold

the shaft and worm together. The steering worm sector is forged and machined in the same piece with its shaft.

The housing of the steering gear mechanism is made of three steel forgings, electrically welded together. This housing is then electrically welded to the steering column. Such a one-piece steel unit is naturally much sturdier than if several parts were used and bolted or riveted together.

Throughout, the new Ford steering mechanism is so simple in design and so carefully made that it requires practically no attention. The only thing for you to do is to have the front steering spindles, spindle connecting rods, and drag link lubricated every 500 miles and the steering gear lubricated every 2000 miles.

For this work, you will find it best to consult the Ford dealer. He has been specially trained and equipped to help you get the greatest possible use from your car over the longest period of time at a minimum of trouble and expense.
