TILSON TELLS HOW TO GROW TOBACCO HERE

County Agent C. W. Tilson has prepared for the Journal a statement to the farmers giving information as to the best method of tobacco culture in this county. The Journal believes that this will be live and interesting news in view of the revival of tobacco growing in this county.

Preparing The Land
The last week in April the land where the tobacco will be set this spring is to be disked thoroughly into a fine, deep, loamy, seed bed.

Applying Manure
If you apply stable manure put on a fair application before the land is disked and work it into the soil.

Laying Off Rows
About May 6 to 8 harrow the land good again and lay it off into rows 12 feet apart.

Fertilizing
Sow in the furrow and cover with plow or put in with corn drill 600 to 700 lbs of fertilizer if manure is used or 1000 pounds per acre without manure.

The fertilizer should be about 3 inches under ground and the top of the row where the plants are to be set should be about level with the other ground.

Use 12-4-6 tobacco fertilizer on heavy rich land or 8-4-6 on light, thin land. 12-3-5 would be the next best fertilizer to use on rich land if 12-4-6 is not available.

Time To Set Plants
Now after about a week or ten days when the weather has settled which is usually May 15 to May 20 the plants should be set in the field.

Care Of Plants In Bed
The way spring looks now the canes may be taken off the beds about May 5 to 8 so the plants will have a week or ten days to harden before transplanting. If a cold snap comes and your bed is in the valley then recover at night.

Setting Plants
When you are ready to set the plants in the field put them 15 to 18 inches apart in the row.

Do not pull plants too small. Use good, stocky plants with strong roots and be careful not to bruise the stem in pulling them up.

Set the plants with roots straight down into the soil and press the dirt firmly around the roots.
Plants are usually set after a moderate rain when the ground is good and moist; but never set when the ground is muddy or sticky wet.

If we have no rains to moisten the ground for plant setting, the plants may be set in the latter part of the afternoon and water moderately at setting.

Cultivation
Cultivation with a sharp tooth one horse cultivator should start in a very few days after plants are set. Never allow the ground surface to crust in the middles or around the plants. Do not hill up the plant in being, but stir the dirt and rake fresh dirt around plants.
Information will follow about pruning and further cultivation when it is needed.

ATHLETICS AT S. C. I.

Much enthusiasm is manifested in athletics at S. C. I. The institution has always been proud of the record her teams have made in all branches in which they have participated. We believe in athletics, because it not only develops the physique of the student, but it furnishes adequate training in clean, healthy living; and proves to be a stepping stone toward strong, clean manhood and womanhood. We uphold the ideal of playing the game fair, after having trained carefully for it. In so doing we learn one of life's greatest lessons—self control; a great lesson because "He that ruleth well his own spirit is greater than he that taketh the city."

When school started, Coach Roberts began getting ready to start football. The boys were a little more experienced this year than they were last, most all of them having had the advantage of last year's training.

They started practicing hard because they meant to have a team. They slept, walked, thought and talked football, until Thanksgiving. They had a very successful season, winning four games, losing two and

There will be two performances of the commencement play, matinee and night. The admission charge in the afternoon will be 15 and 25 cents, and any school child in Jackson county will be admitted for 15 cents. Afternoon performance at 1:30, evening 8 o'clock.

The public is most cordially invited to attend these exercises.

It will be easy to see that football is the most popular sport at S. C. I. The girls helped the boys from the side line, where they gave their voices and some little prayers in their hearts, to help them. I might add that the boys beat S. C. I.'s friendly rival S. H. S., at the end of the season, that being the biggest triumph of all.

After Thanksgiving, Coach Roberts changed from football to basketball, a much tamer sport. The girls also participated in this. Although there was not so much interest in basketball as football, we all had had ball was not as successful as the season was not as successful as the football season had been. The boys lost more games than they won, and the worst of all, S. H. S., the enemy in all sports, beat them. The girls came out about even, although S. H. S. beat one game and S. C. I. the other. There were nine boys and eight girls out for basketball. There was not so much material to pick the teams from. Under the circumstances we think we did pretty well in basketball. Each team won one game at the Callowhee Tournament and got beat the second game; the girls losing the one that they won last year. Then Coach Roberts guided his

boys to baseball, which he thinks will be more successful than the other two sports that have just been reviewed. Last year the boys won the Western North Carolina High School Baseball Championship, and hope to win it again this year. By the way they have started off, it is promising. They have played one game with Bryson City and one with Waynesville and won both games. Coach Roberts has said that they have a good chance for the championship again this year. He has two games here this week, let's give him support. He has been trying to help the town and the school by putting out ball teams, and, up to now, no one seems interested, that is except the school. Let's give Coach some cooperation and show him that we appreciate what he has done for the town and school.
