 Senator King of Utah in the name of Democracy refuses to accept any responsibility for blocking President Hoover's restoration of business. Sounds reasonable; Ye Paragapher personally knows several Democrats who would be willing to extend the Republican administration unlimited credit in return for a bit of hard cash.

Why A & P prices for good food are low

A & P has millions of customers all over the country, and more customers are coming to A & P stores every day because they find there the good food they want at prices they know to be as low as is possible to a going business.

There is no secret about this. Like everyone else in business, A & P buys goods to sell them at a profit. A & P's unusual success is due to two facts:

(1) A & P buys the best wherever the best can be bought at greatest advantage to A & P customers; (2) A & P sells the best for only a little more than the best costs—plus selling expense. It can do both these things because so many people buy in its stores.

These people know that A & P passes on to them all the saving when prices fall at the sources of supply, retaining, under all conditions, no more than its regular profit—2 1/2 cents in the dollar.
