FORECASTS DEMOCRATIC HOUSE-CHANCE FOR SENATE

Washington, October 29-In a forecast of the November election results, Chairman Jouett Shouse of the Democratic National Executive Committee, in a public statement

"I unhe itatingly make the pre-

diction today based on a dispassionate summary of the facts, allowing full consideration to over optimism in some of our reports, that the House of Representatives of the Sev enty Second Congress will show a Democratic majority. To attain this requires that the Democrats should elect Representatives to 544 seats now held by Republicans. My figures show a minimum of 60 seats in this category. I firmly believe that the overturn will be nearer 70 than 60."

Chairman Shiuse points out that he does not mean control through coalition with the Progressive wing of the Republican Party in House, but " a definite working majority of the Democratic Party, regardless of Republican rifts and factions in the House membership."

Concerning results in in the Senatorial election, Chairman Shouse say that "there are too many States in which the is are is close to justify : similar prediction."

Citing the present complexion of the Senate as 39 Democrats, 56 Re oublican · and 1 Farmer-Laborite, he

"The most conservative estimate for the Senate after March 4, 1931. according to our report, gives us 45 Democrats, 50 Republicans, including all their factions, and the one Farmer-Labor man, Shipstead. This takes no account of such States as Illinois, Minnesota, South Dakota. Colorado and Wyoming, in all of which the outcome is doubtful.

If we win in three of these doubt ful States we will have one more Senator than the Republicans."

He calls attention to the fact that in several of these states corre pondents of the great new papers give the Democrats the best of the situa-
