The frame of the new Baptist church is up and the work is going on nicely. All that is lacking is for those who have subscribed to this building either in lumber, work or money to come forward and comply with their pledges.

HOME AGENT WILL GO TO CATAWBA COUNTY

Miss Jane Cobb, who has been Home Agent for Jackson and Swain counties for several weeks, has been ordered to Catawba to take up the work there, the home agent work here having been discontinued.

Catawba pays part of the salary for the work, and the State pay nothing. The cut in the State budget made it necessary to dispense with the work in the non-participating counties.

Policies Of President Get Support

(Special to The Journal)

Washington, D. C., Jan. 27.—One of the most interesting turns gossip is taking these days is as to how strongly President Hoover's policies are being adopted by Congress...

Up to now there has been a lot of talk by Congressmen who have been attempting to seize the reins of Government. They have not hesitated to challenge the motives of men placed in the highest positions but, so far, they have been unable to produce anything to warrant the removal from office of any of the men attacked...

Perhaps the most important action taken by Congress so far has been the passage of the two billion dollar reconstruction finance corporation measure, designed to absorb frozen securities now in the hands of insurance companies, banking institutions, building and loan securities, railroads and agriculture.

The Democratic bloc warmly supported the measure, in spite of the fact that a lot of credit for its passage will naturally go to Mr. Hoover for his sponsorship of the bill.

He is also taking advantage of the compliance of the Democrats in urging his other main projects, most of which are designed to reduce Government expenses.

It is likely that both the President and Congress will have a big fight on their hands from nearly all governmental bureaus in their attempts to consolidate them and cut red tape.

While there is no question that the Democratic Party is even now jubilant over its prospects for success in the coming campaign, the old Republican warhorses are not turning a hair.

In the last sixteen Presidential campaigns the Democrats have won exactly four times, Cleveland and Wilson each winning twice.

One prediction being made is that the coming election will see a total of at least fifty million votes cast and that the winner will go in with a tremendous vote.

The Democratic Victory Drive, for funds with which to pay up the deficit in the Treasury of the National Democratic Executive Committee...

TODAY and TOMORROW

(By Frank Parker Stockbridge) Coolidge

I heard the latest Calvin Coolidge anecdote the other night from a gentleman who had recently visited the ex-president at Northampton.

"Everywhere I go I find an overwhelming desire to have you back in the White House, Mr. Coolidge," my informant said to him.

"No," he said, "It won't do. The basis of that idea is all wrong. They all want to get rich again."

Which confirms my long held belief that Calvin Coolidge has about as sound common sense and as keen an understanding of popular psychology as any living American.

HOOPER

I think there has been a noticeable change in the public attitude toward Mr. Hoover in the past month. At least, I hear less abuse of the President and more expressions of sympathy.

I have not seen the President for several months, but friends who have talked with him lately say that he acts and talks like a man who had found the answers to problems that had been baffling him.

Washington's favorite indoor sport is lying about the President, whoever the President may happen to be. Mr. Hoover has suffered from more than his share of misrepresentation...

UNEMPLOYMENT

The town of Peekskill, New York, as a part of its plan to raise funds for the relief of the unemployed, put tin boxes at every eating place in town and asked everybody to drop one cent in the box before each meal.

More important than raising money for the unemployed, it seems to me, is making sure that this money does not go to people who could get jobs, but who will not take them.

"There were forty-two jobs at \$6 a day," said one of them. "The unemployment bureau sent us fifty men and thirty-six of them refused to work because they would get their hands dirty."

There is no doubt in my mind that, in the cities at least, a large part of the money which kind-hearted people have contributed to help the unemployed is being spent to keep in idleness men who could easily find work if they were not what Down-Easters call "choosy."

DOCTORS

Doctors, like everybody else, are not finding it easy to meet their obligations or collect their bills these days. Too many people think that the doctor can wait until everybody else has been paid.

The American Medical Association has been making a survey of doctors' incomes and reports that it takes altogether about ten years in college and hospital work and getting a practice established before the average doctor begins to earn enough to live on.

Every doctor has to do, and does do, a certain amount of charity work. Those who can afford to pay have less excuse for postponing their doctors' bills than for deferring payment of almost any other debts.

HOLMES

The retirement of Justice Oliver Wendell Holmes from the bench of the United States Supreme Court at the age of ninety-one removes from public life not only one of the ablest and most distinguished of jurists...
