Washington, Jan. 16. (Special) -With the complete machinery of Government in full swing-Congress in session, the Supreme Court on the bench and the Executive departments, which never take a vacation, functioning full speed-Washington today presents a seene of unparalleled activity.

/The city is so crowled that many of the new Senators nad Representatives, who had no previous Washington experience, have found it impossible to get houses, apartments or even hotel accommodations within the reach of their pocketbooks. Washington's attitude toward the denizens Mr. and Mrs. G. W. Spake returned of Capitol Hill is that they are only o this county Tuesday, and we learn transients, anyway, and let them take a hall bedroom if they can't find anything else. New members who came expecting to be welcomed at the station by a brass band and flooded with invitations to social affairs, are discovering that, no matter how big they may be in their home towns, they are only so many votes foror against-Administration measures when they get to Washington. Only after years of service does a Senator or a Representative establish himself as a personality in the Washington hurley-burley.

One of the first things a new member learns, however, is that the 'allowances'' above his salary are worth conserving. There is nothing in law or custom to prevent a Senator or Representative from putting his wife, his son, his daughter or other relatives on the Federal payroll. Each member is entitled to a secretary and to other clerical help, and if he is a committee chairman he has the naming of important paid employees of the committee. A recent count showel 44 persons bearing the same names as Senators and Representatives, on the list of Congressional secretaries. A frugal member can save pretty nearly all of his \$10,000 1 year salary, and many do just that. Very few members ever get their names in the big newspapers, but the corps of Washington correspondents now includes scores of young men who make a specialty of getting these unknown members a "break" in their home district newspapers. All that is necessary for the average member to do to get favorable mention in home paper dispatches is to introduce plenty of bills which are calculated to impress the home voters. Seldom do any of these bills get beyond the committee to which they are referred, and it is one of the rarest of events for a new member of either house to get a chance to make a speech. All he is expected to do or has much of a chance to do is to be Senate is a democrat. They are going "regular" and vote the way his party leaders tell him to. \* The new Congress will play ball This is an era of "reform." When with the President-on everything but the bonus. It would be a good idea, it seem to me, to introduce into the early rade, of the public schools some art of education in advertising. In his practical world, nothing is more important than to know real valuenot how to determine them. It could easily be indicessed upon the mind f children that certain types of ad vertising are only traps for the ig orant, and that goods of quality are never offered for less than they are worth.

Billto repeal the present system of county government, the election laws and the railroad commission. A bill to repeal the law providing for letting the public printing to the lowest bidder was rushed through to keep from acting on bids which have been submitted. The business like method of giving the taxpayers a chance of having their work done at the lowest price didn't suit the fusionists. They preferred that the work cost more than usual rather than risk the chance of a democratic printing office being the lowest bidder. The pre siding officers of both Houses were shorn of their power to appoint the committees for the first time in the history of the State. This was done because the presiding officer of the
