Cullowhee School Closes

(Continued from page one)
Youngblood, father of the class salutatorian, Opal Youngblood who gave the welcome address.
Marion Cooper talked briefly on the commencement theme, "Democracy in Education," after which Lora Alice Lone who is class valedictorian, made her address.
Prof. R. L. Madison, founder of Western Carolina Teachers College, in following his annual custom at high school or college graduation, presented gifts to members of the class whose parents and grandparents have been his students. The award of medals and prizes was made by E. V. Deans, Jr. Mr. C. A. Hoyle, principal of the training school, then presented the diplomas to the graduates. After the presentation, Dr. H. C. Smith, director of the training school closed the commencement and the school year with a benediction.

Room Improvement School Conducted at Webster

Miss Rose Elwood Bryan, State Home Demonstration Agent at Large, conducted a school in 4.H Room Improvement, at the Webster High School building, on Friday, May 16. The 4.H Club girls majoring this project, from Jackson, Macon, Swain and Clay counties, with the Home Demonstration Agents, attended the meeting. In addition to the lecture, Miss Bryan had a very educational exhibit of the different units in a girl's bedroom. The units included curtains, the sleeping unit, the dressing unit, the storage unit, the study unit, and proper finishes for walls and floors.

State College Answers Timely Farm Questions

QUESTION—How can I control the pickle worm that affects my cantaloupes each year?
ANSWER—Satisfactory control of both the pickle worm and the melon treatments when the worms first appear on the plants and continue at five to seven day intervals as long as the worms are present. Care should be taken to secure complete coverage of fruit, stems, and leaves as well as the growing tips of the plants. The rate of application depends upon the size of the plants, but should range from 15 to 20 pounds an acre for each application.
QUESTION—How much molasses should I use to each ton of green feed in making grass silage?
ANSWER—The quantity needed will depend upon the crop used for worm can be obtained by thorough and frequent applications of a .75 percent rotenone-talc dust. Start the silage. For cereals or a mixture of cereals and legumes, from 60 to 70 pounds of molasses should be used to each ton of green feed. Alfalfa or clover should have 80 pounds and soybeans 100 pounds. Smaller quantities have been used successfully, but the larger amounts give better results. When molasses is used, set the cutter bar to cut in lengths of one-quarter to one-half inch and be sure the knives are sharp and in good condition.

Offset

The increased number of sows farrowing this spring as compared with a year ago is expected to more than offset reported losses of spring pigs in some areas.

WANTED—Reliable party with truck to distribute Pepsi-Cola and full line of soft drinks in Jackson, Haywood, Macon, Swain, Graham, Cherokee, and Clay Counties. Write Pepsi-Cola Bottling Co., Asheville.

PIANO FOR SALE—We have in this county one nice, slightly used piano to repossess. The unpaid balance is \$87.50. Would be glad to transfer this to some responsible party at \$6.00 down and \$6.00 per month. Fully guaranteed. Write E. R. Magness Piano Co., Forest City, N. C.

CARD OF THANKS

We wish to take this opportunity to thank our many friends for their kindness and support shown during the illness and death of our dear wife and mother.

CATTLE DISEASE CONTROL SOUGHT

123 ACRES IN HAMBURG
Lovely building sites, small lake, good trout fishing. Plenty of merchantable bark, wood, and saw timber to more than pay for property. \$1000 buys it. Mrs. Myra Loftis, Greenville, N. C.

Raleigh, May 22—Dr. William Moore, chief of the State Department of Agriculture's veterinary division, estimates that 65 per cent of animals with Bangs diseases have been slaughtered in North Carolina to date. Regarded as the most serious economic threat to the state's dairy industry, will be under complete control in the state within the next three years, Dr. Moore predicted. Bang's disease is a malady of cattle that lowers milk production and interferes with reproduction, he explained. When animals are found with the disease, condemnation is ordered and owners are paid not to exceed \$50 for purebred and \$25 for grade stock.

North Carolina's peanut crop has averaged in value about \$9,773,000 during the past three years, reports the State Department of Agriculture.

Record

Milk production in 1938 reached a new peak about 4 per cent higher than in 1937, and 2 per cent above the preceding high in 1933, says John Arey, dairyman of the State College Extension Service.

Baby Beeves

Jasper Tyson, Wilton Cox, James Blanchard, and Press Pate, Greene County 4.H Club members, are planning to purchase baby beef calves to feed out this fall and winter.

Electric Farm At World's Fair

NEW YORK, N. Y. . . Mr. and Mrs. J. F. Moulton, who are the only persons living on the Fair Grounds, are shown above at the Electric Farm exhibit at the New York World's Fair, representing the farmer and his wife.

Victim Of Broken Neck Going To Grotto

DETROIT, Mich. . . David Van Wallace, who has been bed-ridden for 15 years because of a broken neck, is to be granted a long-wished-for visit to the Grotto of Miracles, Lourdes, France. Now aged 32, he is shown (left) with his mother and father inside the specially-built automobile in which he travels.

King And Queen Welcomed To Canada

King George and Queen Elizabeth are shown on thrones in Canada's Parliament as they were formally welcomed to Canada. They plan to visit the United States early in June.

NAGGING BACKACHE

Modern life with its hurry and worry, irregular habits, improper eating and drinking, exposure, contagion, unclean, keep doctors busy, hospitalize you, and disturb the kidneys and often times people suffer without knowing that disordered kidney action may cause the trouble.

After eating, liver and stomach the body is an increased body, therefore the kidneys must filter from the blood. The kidneys are stricken and fail to remove excess acids, and the harmful waste, there is poisoning of the body.

Causes of disordered kidney action may be: drinking, eating, and drinking, and the kidneys are stricken and fail to remove excess acids, and the harmful waste, there is poisoning of the body.

Doan's Backache Kidney Pills are the only pills that will cure backache, kidney trouble, and all the ailments that result from disordered kidney action.

DOAN'S BACKACHE KIDNEY PILLS

Show Cattle

If plans now in the making mature, Madison County will be represented by six to eight fat and feeder calves at the Asheville Fat Stock Show this fall.

Loans

Wheat loans on the 1939 crop will be offered producers who keep within their wheat acreage allotment under the 1939 AAA program, the U. S. Department of Agriculture has announced.

Slipping

American farmers received estimated \$463,000,000 for their products in April, a decrease of 5 per cent under the \$488,000,000 received during the same month a year ago.

Raleigh, May 29—More than 256,000 acres of white pine trees are now being protected against the ravages of white pine blister rust, C. H. Bran-non, chief of the North Carolina Department of Agriculture's entomology division, said today. Blister rust control work is now being conducted in 16 counties: Buncombe, Burke, Caldwell, Cherokee, Clay, Graham, Haywood, Jackson,

Macon, McDowell, Mitchell, Hoke, Swain, Transylvania, Watauga and Yancey. In controlling the disease, Bran-non explained that more than 1,500,000 currant and gooseberry bushes have been destroyed. Blister rust spreads from currant or gooseberry bush to the pines and unless the bushes are destroyed, the disease remains a constant threat to the white pines of the state.

FACTS FAVOR FORD

- 1 The 1939 Ford V-8 is a beautiful, modern motor car. Its 85-horsepower engine gives you economical, well-balanced performance over the entire speed range—and the 60-horsepower engine is even more economical.
- 2 The structural strength of the Ford car—frame, bracing, axles, body—makes not only for safety, but durability and long life.
- 3 Ford hydraulic brakes are exceptionally large and strong in proportion to car weight.
- 4 The Ford car is stabilized for comfortable riding. Its springbase, the distance between front and rear suspension, is 123 inches. Seats are toward the center, perfectly balanced. The car does not bob or dip and can have very little sway.

These four points—power, strength, safety, comfort—are by far the most important essentials in any motor car. They form the basic value of your investment.

With this solid foundation to build on, the Ford V-8 has been made beautiful, spacious, easy to drive. It is richly upholstered and has all the modern features which add to the luxury and pleasure of motoring.

You can see these things when you take a trial drive, but do not forget that the main value is in the things you do not readily see—quality of materials, precision of manufacture, fundamental engineering.
