Saves about 8 leaves, that are usually wasted, on each plant, the primings when cured in the Modern Barn are worth double the price of fillers. The bugs are made the best tobacco on the plant and bring the highest price as cutters and wrappers. No trash tobacco in the crop. The top leaves mature earlier and better when the lower leaves are removed as fast as they mature. The barn is fire proof and will cost if constructed of the best material \$200.
