SOUTHERN RAILWAY COMPANY. (Piedmont Air Line.) THIRD DIVISION.

Published Schedule in effect April 21, 1895. This schedule is published as information only and is subject to change without notice to the public.

Table with columns for No. 11, No. 12, and No. 13, listing routes between Salisbury, Asheville and Paint Rock.

Table with columns for No. 17, No. 18, and No. 19, listing routes between Asheville and Murphy.

SLEEPING CAR SERVICE. Nos. 37 and 38, Washington and Southwestern Limited, composed of Pullman cars...

Chester & Lenoir N. G. Railroad Schedule

In effect March 25, 1894. The passenger train from South leaves Hickory 1:12 p. m.

Connects at Hickory and Newton with W. N. C. trains, at Lincoln with C. C. trains east and west...

Hon. Chas. F. Crisp is now at Asheville for a sojourn of several weeks.

Mr. Mortimer Sides, of Connelly Springs, has moved to Mitchell county.

Eczema is thoroughly eradicated by the persistent use of Ayer's Sarsaparilla.

Lawyer McIntosh and Mr. 'Boomer' Matheson, of Talorsville, were in Hickory Friday.

Mr. George W. Cochran, of Newton, was in the city on business Thursday, the 9th inst.

Under the new city board Rev. Mr. Crouse has superseded 'Squire Killian as treasurer of the city.

Morganton, after trying the no license system for twenty years, voted wet on Monday, May 6.

At Fayetteville, recently, Will Brown, a white man, was killed by a negro named Holmes. The murderer is in jail.

The rains of last week gave a full volume of water to the Catawba river, and Mr. H. L. Moore says it made ferrying delightful.

Mr. Charles F. Bahnson, of Farmington, Assistant Grand Masonic Lecturer, delivered a lecture to the Lodge here Monday night, May 6th.

Buckingham's Dye for the Whiskers does its work thoroughly, coloring a uniform brown or black, which, when dry, will neither rub, wash off, nor soil linen.

The advertisement of Rev. J. L. Murphy in this paper of a lost watch, resulted in its recovery Thursday of last week. The truth is the world is moved by advertising.

Rev. James A. Ramsay commenced services in the Newton Presbyterian church Friday night, preparatory to the celebration of the Holy Communion on Sunday morning.

Several of our esteemed contemporaries have been boasting of old coins, but our Mr. Joseph Walters has called our attention to a coin, now in his possession, which is 153 years old, thirty years older than any coin so far mentioned.

The cylinder heads of the South bound freight and the North bound passenger engines of the Chester & Le-

noir R. R., blew out on the 6th inst. The accident occurred to the freight between Newton and Maiden, and to the passenger just west of Hickory.

Sufferers from physical and nervous debility find great relief in the use of Ayer's Sarsaparilla. Far better than any stimulant, its effect is not transient and superficial, but deep and permanent. It builds up the system by purifying and enriching the blood.

The next Annual Commencement of the Franklin Literary Society of Hon. ner Military School, Oxford, requests our presence, Friday evening, May 31st. We are duly grateful for the honor conferred, and if circumstances favored attendance we should gladly be present.

It May Do Much For You.

Mr. Fred Miller, of Irving, Ill., writes that he had a Severe Kidney trouble for many years, with severe pains in his back, and also that his bladder was affected. He tried many so called Kidney cures but without any good result. About a year ago he began the use of Electric Bitters and found relief at once. Electric Bitters is especially adapted to the cure of all Kidney and Liver troubles and often gives almost instant relief. One trial will prove our statement. Price only 50c. for large bottle. At Royster's Drug Store and Norman's Drug Store.

We now regard the prospect for the Southern Railway officials placing a vestibuled train on the road from Asheville to Salisbury as most flattering. This matter has been under consideration since the reorganization, but it has just assumed definite enough form to encourage us to look for its early realization.

If King Solomon was alive he would now say: "Go to the traveling man, learn his ways, and be wise." Mr. C. W. Battell, a Cincinnati traveling man representing the Queen City Printing Ink Co., after suffering intensely for two or three days with lameness of the shoulder, resulting from rheumatism, completely cured it with two applications of Chamberlain's Pain Balm. This remedy is gaining a wide reputation for its prompt cures of rheumatism, lame back, sprains, swellings, and lameness. 50 cent bottles are for sale by O. M. Royster Druggist. 18-4t

Prof. Crouse put in his lever, took the treasurership of the city for \$50 per year, and 'Squire Killian, who held it at \$100 per year, and was a candidate for re-election, was retired. Gentlemen, preserve harmony; it's not our funeral. The people are always pleased by economic reforms, and to that extent and no further do they feel an interest in the matter.

Knights of the Maccabees.

The State Commander writes us from Lincoln, Neb., as follows: "After trying other medicines for what seemed to be a very obstinate cough in our two children we tried Dr. King's New Discovery and at the end of two days the cough entirely left them. We will not be without it hereafter, as our experience proves that it cures where all other remedies fail."—Signed E. W. Stevens, State Com.—Why not give this great medicine a trial, as it is guaranteed and trial bottles are free at O. M. Royster's Drug Store. Regular size 50c and \$1.00.

'Squire Hull, of Mull Grove, one of the county's most prominent citizens, and a most highly appreciated subscriber of the PRESS AND CAROLINIAN, was in the city, trading, on the 9th inst. He is a most generous, whole-souled man; but, no, we won't give specifications, for we hold that the scriptural injunction, "Do not let the right hand know what the left doth," is a good one.

Persons who sympathize with the afflicted will rejoice with D. E. Carr of 1235 Harrison street, Kansas City. He is an old sufferer from inflammatory rheumatism, but has not heretofore been troubled in this climate. Last winter he went up into Wisconsin, and in consequence has had another attack. "It came upon me again very acute and severe," he said. "My joints swelled and became inflamed; sore to touch or almost to look at. Upon the urgent request of my mother-in-law I tried Chamberlain's Pain Balm to reduce the swelling and ease the pain, and to my agreeable surprise, it did both. I have used three fifty-cent bottles and believe it to be the finest thing for rheumatism, pains and swellings extant. For sale by O. M. Royster Druggist. 18-4t

The 44th Annual Commencement of Catawba College, Newton, N. C., occurs May 19th to 23rd. The Baccalaureate sermon will be preached by President J. C. Clapp; the Alumni address will be delivered by Prof. C. H. Mebane; the Literary address is assigned to Rev. J. L. Murphy, of Hickory. It will no doubt be a brilliant occasion, and one to be greatly enjoyed and long remembered.

FITS CURED

(From U. S. Journal of Medicine.) Prof. W. H. Pecke, who makes a specialty of Epilepsy, has without doubt treated and cured more cases than any living Physician; his success is astonishing. We have heard of cases of 20 years' standing cured by him. He publishes a valuable work on this disease which he sends with a large bottle of his absolute cure, free to any sufferer who may send their P.O. and Express address. We advise anyone wishing a cure to address, Prof. W. H. PEEKE, P. O., 4 Cedar St., New York.

HARVESTING CRIMSON CLOVER.

On this subject those who have had little or no experience will need some help in order to avoid losses of time and feed.

The most vigorous growths of this clover may be cut before the flowers come out; and still leave vitality enough in the roots to make a second growth and ripen seed.

When this is done, or hay is made from the crop, it needs to be handled carefully to avoid losing the leaves.

To make clover hay well requires good judgment and quick work at the right time, and coolness enough to pursue a "masterly inactive" course with it at other times. Cut the clover, preferably late in the afternoon when the weather promises to be fine. If left in swath, next morning turn it bottom up if thick enough to need it.

When well wilted or just dry enough to rake and to be handled without breaking, rake into windrows; or, if thick on the ground, pitch directly into small cocks. No rolling of windrows is allowable, but if raked it must be pitched into cocks as described in Bulletin No. 83, p 149 of the N. C. Experiment Station.

When the windrow has dried so as to be brittle stop work on it. At evening it will get moist again and may be finished between five or six o'clock and dark.

Examination of the cocks will indicate when and how much handling should be given. These may stand from one to several days according to condition of clover when put up and the weather, but they should not be left long enough for mould to start in the clover.

On a bright morning when the outside has nearly dried off, begin to handle the clover by taking up thin layers and reversing. Take six inches to a foot of the top at the first forkful from a cock according to dryness; and without shaking, deposit it on a dry place beside the first cock but turn the fork in the hand so the top of the cock rests on the ground. If all dry serve the next layer the same. Toward the bottom the clover will be damp, then green and wet. Shake this up well and lay on top as loosely as possible. The shaking in the sunshine and dries the clover, and reversing in this way brings the part which needs further curing to the surface. At the same time, the limp green clover hangs down over the top and sides in such a way as to protect the dry bottom and middle of the new cock from rain if moderate showers fall on it. If need be, go over the clover again but unless very heavy on the ground or bad weather ensues, cocking over once will be sufficient. When apparently ready to store begin early before the morning dew is off and load the very driest. Then before going to the barn or stack, examine enough for next load and probably the bottoms of the cocks will be found wet. Tip them bottom up by first setting the fork at the edge of the cock so the "Lift" on the fork will be opposite the usual work with it. Make a forward movement in lifting and the cock rolls over while the reserved fork does not disturb the clover but slips out easily. Turn the cocks from the sun so the damp places may have the benefit of its direct rays.

These directions should be modified in practice to suit special conditions, and the weather, which can not be controlled. Here is where good judgment is needed.

In saving seed of crimson clover cut as soon as the plants have assumed a rich golden yellow and the seed has hardened. Do not wait for it to get "dead ripe" because too much of it will be lost.

If the clover is mown by hand, keep the scythe sharp and carry the clover all into the swath with a regular steady stroke. It can be handled then much better. On a small scale, it may be best to leave it in swath until ready to house and thresh, which must be as soon as dry; or else turn the swath if heavy by inserting a broad long-tined fork to the length of the tines and when tops lie together turn over toward the butts of the culms. When this side is dry (but not dry enough to lose leaves or seed) pitch to small cocks and from those to the tight bottomed wagon which carries it to the stack or threshing floor. Be sure that unloading storage places have clean smooth dry floors from which the seed in chaff can be cleaned up, because considerable part of it is usually threshed off in this handling.

Threshing small lots as peas or beans are threshed, is the only way to get the seed out. This seed is sown in the chaff.

On a larger scale a moving machine with an apron behind the cutter bar, or a self-rake reaper may be used to cut the clover. If a mower is used, a man with a light wooden rake should

follow it up and pull off the clover in gavel, imitating in this the action of the self-rake reaper, observing to place each gavel far enough behind the machine as not to be trampled by the team, or machine, at the next round. They should be so placed by the men if turned that the wagon can thread its way through without moving them and two men with long broad forks take each gavel up lightly and place on the load.

With careful active men this is an economical method of handling and there will be little or no use for a rake when the wagons have passed over the field.

This clover should be threshed, hulled, and barged for market in a clover seed huller. Crimson clover should be grown in North Carolina in sufficient quantity to warrant the use of a \$450-00 huller in almost every county. This would enrich the farmers, and the State beyond estimate. Frank E. Emery, Agriculturist N. C. Experiment Station.

To nursing mothers, Dr. Pierce's Favorite Prescription is a priceless boon, for it not only strengthens the mother, but also promotes an abundant secretion of nourishment for the child. For those about to become mothers, it is even more valuable, for it lessens the pains and pains of childbirth and stimulates labor. Of all dealers.

Ovarian, fibroid and other tumors cured without resort to surgical operations. For pamphlet, testimonials and references send to cents (or postage) to World's Dispensary Medical Association, Buffalo, N. Y.

The Supreme Court has decided that H. G. Ewart is entitled to the Grand Old Court of Western North Carolina without a dissenting vote.

Morganton News Clippings, May 9th. We acknowledge, with thanks, the receipt of an invitation to attend the annual commencement of Claremont Female College, Hickory, N. C., May 12th, 13th, 16th and 17th.

Mr. Rufus A. Winters and Miss Florence Crawley were married yesterday afternoon, May 7th, at L. Crawley's home in Quaker Meadows. Rev. A. G. Gantt performed the ceremony.

Died, at her home near Morganton, Tuesday, May 7th, Miss Eliza Shuping. She was buried yesterday at the city cemetery. Miss Shuping was a very estimable young lady, beloved by all who knew her.

The electrical storm last Saturday evening was one of the most severe ever experienced in Morganton and the rainfall was phenomenal. We are informed that the lightning struck eleven times inside the town limits during the storm. Messrs. W. H. Sloan and J. J. Carrison had cows killed by lightning.

We have been honored with an invitation to the wedding of Miss Addie Sue Harris of Raleigh to Mr. Will X. Coley of Mocksville, Wednesday, May the 15th. Mr. Coley is editor of the Davie Times, and it was here, he met many of our people at the Press Convention. We hope the young couple will live long and happily.

To the Confederate Dead.

We received the following letter last Friday: The unveiling of North Carolina's monument to the Confederate dead will take place in the capitol grounds on Monday, May 20, 1895. You are respectfully invited to be present and participate in the commemoration of their heroic lives and deeds. Committee on Invitation.—C. B. Denson, T. S. Kenan, S. A. Ashe, R. H. Battle, Octavian Coke.

20 YEARS AGO

a discovery of the greatest possible benefit to mankind was made in medicine. Physicians universally recognized its beneficent results and welcomed it as one of the most valuable remedial agents that has been developed in medicine, because it covered such a wide range of usefulness and brought into requisition the most remarkable food-medicine in existence. This discovery was

Scott's Emulsion

and this wonderful nutrient was Cod-liver Oil, but until it was made available in Scott's Emulsion it was almost useless, but by their process of emulsifying it and making it palatable and easy of assimilation, and adding to it the Hypophosphites of Lime and Soda, they have given the world a remarkable curative agent in all wasting diseases, both in children and adults.

Scott & Bowne, New York. All Druggists. 50c. and \$1.

J. L. COLAY & SON, Jolimon Vineyards, OLD FORT, N. C.

PURE NATIVE WINES. DISTILLERY OF FRENCH COGNAC. Awarded First Premium at the Exhibition of New Bern, N. C. "He, who chooses well his wine, assures his health." Address them at OLD FORT, N. C.

They are being manufactured and sold at astonishingly low prices. You can buy them for a very little HARD CASH. The Desks talk for themselves. FACTORY: RICHMOND, IND., U. S. A.

Uses Mexican Mustang Liniment

Sprain cured and crutches thrown away. Bad Gall on his horse's neck cured in 3 days. DURHAM, N. C., Jan. 11, 1895. Lyon Mfg. Co., Brooklyn, N. Y.

Advertisement for Mexican Mustang Liniment featuring a portrait of a man and text: Gentlemen:—For fifteen years I have used Mexican Mustang Liniment, and I consider it the best liniment on earth; I am never without it. I recently used it on a bad gall on my horse's neck and it cured it in three days. I had, also, a bad sprain in my leg and had to use crutches several days. As soon as I began to use Mustang Liniment I felt relief, and in a few days was entirely well. I recommend it to any one needing a liniment for horses or for self, with confidence that they will get their money's worth. Yours, JNO. B. HUTCHINGS. Of Carrington & Hutchings, Prop's of Ream's Warehouse, Durham, N. C.
