Upper Fork Letter.

Correspondence of The Morganton Herald. I will give you a few notes from

Upper Fork again. Our farmers are about through with corn planting. The crop will be a large one this year.

Wheat is looking well and gives promise of an abundant harvest. The fruit crop will be a good one after all. The frost has not injured it so much in this section. Our worthy old bachelor, D. F. Denton, Esq., has decided that it is not good for a man to be alone, and has taken unto himself a wife. He was married to Miss Mattie Ross last week.

Old Mrs. Sally Carswell, probably the oldest person in the State, is no longer numbered among the living. She departed this life April the 19th, at the very ripe old age of 107. She was a member of the Baptist church for a number of years. The last few weeks of her life she spent singing and praying, and when the summons came she said she was ready to go. She leaves to mourn for her, three children, thirty grand children, one hundred and fifteen great grand children and twenty great great grand children. After The Poor Tramp McHenry Was Thought all the changing scenes and joys and sorrows of a century, she has gone to rest in her long home. Mrs. Carswell was buried April 20th. Rev. P. A. Whitener performed the burial ceremony.

Mrs. Margaret Bumgarner died from a relapse of a long spell of 21st. She was the wife of Mr. that place occur, leads us to be-Thomas D. Bumgainer, and a con- lieve that Marion will ere long be sistent member of the Baptist the possessor of another Bird, a a husband and four children be plumage.

has a small place in the Patent of them, and a brief address from the The flocks of snow birds full of lowing this the guests were taken to learn if they were birds of our grounds as thoroughly as the coming up close-and many times limited time would permit. Saturday afternoon Mr. Lan. brown or earth colored plump litcaster very kindly came again ito the form, with a narrow black collar the school accompanied by sev- around its neck and a black skull-E. LOWER CREEK.

In cold weather these birds are will not shine on a single May in flocks from twenty-five to a hundred. From the first coming School for the Deaf and Dumb, of spring they are no longer in flocks. During the summer the families are very tenacious. You" may watch the same six fly hither and thither together, and you may try your best to separate them, but you can't do it. At night they are always on the ground, summer or winter. I have started them up often and they drop down at once in some other place. The long tailed species are the very impersonaof tramps, and vagabonds par ex-E. J. S. WILD.
