

Farm News

their high efficiency and the ease with which the flock can be treated. Nicotine sulphate is not only good for delousing poultry but is also efficient against the tropical fowl mite.

Question: Will a few sheep be profitable on the average farm?
Answer: F. E. Swindell of Linger Longer Farm at Fairfield and County Agent J. P. Woodard of Hyde County can answer this question. Swindell keeps from 15 to 20 sheep on his 80-acre farm and his receipts from lambs and wool during the past three years are \$631. "They run in the fields in winter after the crops are harvested and go to a grazing crop in early spring," Swindell says. "They are good lawn mowers and I find them profitable. I can shoot straight when the dogs bother them."

Question: How can I make a home-made egg candler?
Answer: Take a wooden or card board box and bore a one-inch hole in the end of the box about the center. Suspend a 50 to 75 watt light bulb in the box and provide a reflector, say a white piece of paper, opposite the hole bored in the box. It is a good idea to make a small opening in the top of the box at the back side so that you can see how to move about the room. Candling should be done in a dark room where no light other than the light from the candler is present.

December is sometimes thought of as one of the months when little

farm work is to be done. The fact is, December is the most important month of the year from the standpoint of farm planning and making arrangements for saving time and labor next summer.

Every farm family should make a farm plan during the month of December for the coming year. (For a farm planning book, write to the farm management department, State college, Raleigh).

There are many other jobs that can be done during the month of December, some of which are listed below:

Field Crops
 (1) Piedmont—Continue breaking land for next year's crops. (2) Coastal Plain—Be sure to disc in all stalks. (3) Coastal Plain—Select new tobacco plant bed sites with southern or southwestern exposure—well drained. (4) Mountains—Market your burley tobacco.

Fruits and Vegetables
 (1) Apply fall spray to strawberries around the 15th. (2) Broadcast poultry or stable manure over garden. (3) Break garden in order to let winter freeze pulverize the soil. (4) Muscadine grapes may be pruned.

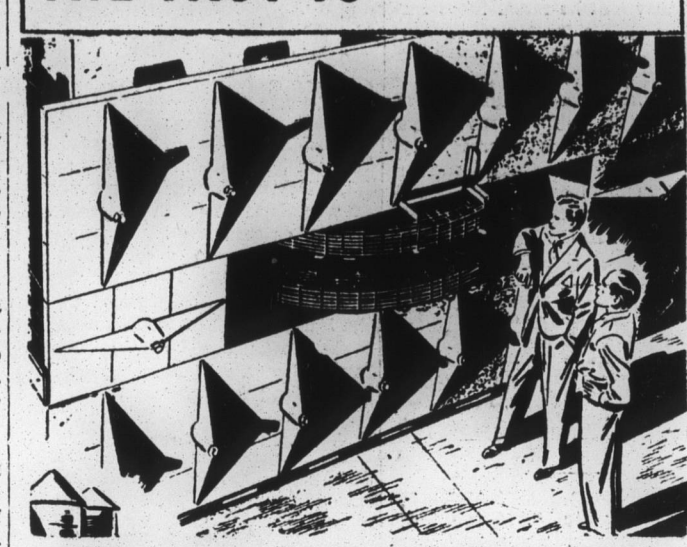

Livestock
 (1) Protect workstock from bad weather. (2) Provide ample exercise for idle workstock, plenty of good hay and small amount of grain. (3) Provide dairy cows with drinking water, warm and dry place. (4) Graze fall sown crops as soon as weather permits. (5) Examine cattle for lice regularly through the winter for infestation. (See farmers' bulletin No. 909 and extension folder No. 50). (6) Be sure plenty of salt and mineral mixture is provided for all livestock. (7) Use protein supplement for beef cattle, if only grass hay is being fed. (8) If available, use silage for feeding beef cattle. (9) Run a few hogs after grain fed beef cattle. (10) About a month before lambing, start feeding ewes one-half pound of grain per day. (11) Handle the fattening hogs with care at killing time as bruises cause spoiling of meat in cure. (12) Kill the hogs for home use in afternoon, let the carcasses hang up overnight to chill, and drain and cut the meat the next morning. (13) After meat is produced, care correctly; two days per pound per piece is usually time enough to cure. For 100 pounds of meat, use eight pounds of salt, three pounds of brown sugar and three ounces salt-peter. (14) If a green grazing is not available, keep a little green colored cured legume hay in hog feeding rack.

Poultry
 (1) Watch laying flock carefully for drop in egg production. If this occurs, feed some wet mash during noon hour. (2) Provide the laying flock with warm drinking water. (3) Gather eggs often in cold weather

and store in an unheated place. If necessary, cover with quilt to prevent freezing. (4) Keep poultry houses clean and dry. (5) Cull and sell unprofitable layers. (6) Turkeys not sold during Thanksgiving market should be finished out for Christmas market.

Around the Home
 (1) And dead limbs or undesirable trees in the yard should be harvested for firewood. (2) Make needed repairs on house and barn. (3) Make arrangements for moving shrubs from the woods to the farmstead. (4) Repair roads around the house and barn. (5) Underpin that house you have planned for many to do.
