Assistant for Multimedia Database Project
A short term challenging project at The Health Sciences Library for a student training to be an information specialist in any field. This project will provide good experience exploring options for creating multimedia database systems. Our goal is to create a multimedia database of faculty owned 35mm slides, radiographs, CT scans, etc. and are currently in the process of doing a needs assessment for this project. As part of the needs assessment we would like to explore database software options commercially available for the creation of a multimedia database and their capabilities. Primary responsibilities: investigating products available to create multimedia databases, creating a specification/ feature list for each of these database systems, investigating indexing and structured language query options available with each system; find contacts working with these databases who have in production mode on campus or in the Triangle, contact the producers of these database products to identify contacts, write a report of the study findings and present to Curriculum Support Coordinator. Skills needed: demonstrated knowledge of multimedia components, experience with advanced relational database creation and experience with vendor and user contact. Flexible work schedule to be determined with supervisor. Approximately 150-175 hrs estimated for completion of project by May 9, 1996. Salary will be \$8-10/hr. Applications available in room 211, Health Sciences Library, 3am-4pm. Contact Pinky Dufosse at 966-2113.
