### Today's Birthdays

Feb. 26. True love and good hard work are your major themes this year. A setback in March or April lets you know who your friends are. It'll be obvious which one you can trust. In July, you'll learn you really must play by the rules, and in August a new career opportunity opens up. November is good for travel or for starting college, and you could learn a new role to play in December. There's hard work and plenty of a round next February, but don't despair. You're making a great impression on the people who have what you want.

### to get the advantage

check the day's rating: 10 is the easiest day, 0 the most challenging. Aries (March 21-April 19). - Today is a 6 - There are several squares in effect today. That's when the moon or a planet is at 90 degrees to another one, causing a blockage in the energy pattern. Today, we're going to have one in communications and hard work. Something you say is likely to be misunderstood, or a job might have to be done over again. Be careful. Taurus (April 20-May 20). - Today is a 6 - Pay attention not only to what you're doing, but also to what the other people are doing. Your intuition should be excellent right now. You can also trust your education. Skills you've been learning recently can be put to good use. Don't wait until you've got the credentials. Go ahead and try the theory. Gemini (May 21-June 21). - Today is a 7 - Today could be a challenge, and not just for you. Looks like it starts out with a breakdown in communication. This is not all that unusual, actually. But today, you might be amazed to see how big a gap there is between what was said and what was heard. Keep that in mind if you're giving any kind of instructions or orders. Cancer (June 22-July 22). - Today is a 6 - There were easy yesterday could go away today, so don't take anything for granted. Make sure the people helping you understand what they're supposed to do. A breakdown in communication would be the most likely cause of an accident or glitch in the work schedule. Not your fault, but why get into it if you don't have to? Leo (July 23-Aug. 22). - Today is a 7 - Proceed with caution today. A simple misunderstanding could get blown out of proportion. If there's money involved, it's even more likely to happen. Better to sign any contracts today for just that reason. You could be thinking the contract says one thing, while the other guy thinks it says something completely different. Virgo (Aug. 23-Sept. 22). - Today is a 6 - Looks like somebody has pinned their hopes and dreams on what you can provide. Not to worry. You're very good at what you do. Go ahead and accept the applause as readily as you do your own criticism. Take credit for something you've done well and don't be the slightest bit nervous about it. Libra (Sept. 23-Oct. 23). - Today is a 6 - You're probably about ready to let your hair down. Just be careful where and when. You don't want to go off of character in front of the wrong audience, and you sure don't want to make fun of somebody you were just kissing up to. That's always in poor taste, and today it could cause you to lose everything you've recently gained. Scorpio (Oct. 24-Nov. 22). - Today is a 6 - Finish old stuff today, rather than beginning new. Looks like there's going to be a stumbling block that you can't really plan for. As you know, the only difference between a stumbling block and a steppingstone is perspective. You can turn this to your advantage, but it might take a little thought. Apply that thought earlier rather than later. Sagittarius (Nov. 23-Dec. 22). - Today is a 5 - You have an interesting weekend ahead of you. Take extra care to go over every step of your agenda carefully. Check everything on and off your list. Ask others if everything that needs to be done has been done, then follow up and make sure. The more thorough you are now, the more relaxed you'll be this weekend. Capricorn (Dec. 23-Jan. 20). - Today is a 4 - You could come up with a brilliant idea today, something so obvious you wonder why you didn't think of it years ago. And it's so crisp, so clean, so appropriate, you might even be able to patent this gizmo, market it and make a fortune. If there's any possibility that it could really happen, definitely write it down. Aquarius (Jan. 21-Feb. 18). - Today is a 6 - You could get a bonus today, but be careful. If you spend it on something that's good for the home and family, you'll prosper. If you spend
