**Today**

2 p.m. - Faculty, staff and students are invited to discuss **University e-mail privacy issues** at an open meeting in 104 Howell Hall. For more information, call Jeanne Smythe at 962-5322.

**For the Record**

In the Aug. 22 article, "UNC-system Community Colleges Collaborate on Bond Campaign," The Daily Tar Heel incorrectly reported that community colleges were not included in the 1999 bond proposal to fund higher education capital improvements.

The 1999 proposal included \$300 million for community college capital improvements. The Daily Tar Heel regrets the error.

**TJ'S**  
From Page 1

If it's questionable, we don't make the deal."

Matt Linens, employee at TJ's and a UNC student, said the convenience store averages about three licenses a week. "With school picking up, we might get more," he said. "I enjoy taking it from them. I like seeing the look on their faces."

Interim Police Chief Gregg Jarvis said cooperation from businesses such as TJ's was crucial to making the ALE programs work, like last weekend's bust that nabbed 68 underage drinkers.

"We really have had a lot of success from most of our merchants," he said. "We really are grateful to those who have made it a public issue."

Tim Morse, assistant lawyer council for the Alcohol Beverage Control Council, said that if caught, 19- to 20-year-olds would receive a class two misdemeanor, and those under 19 would

receive a class one misdemeanor, a more severe charge.

ALE spokeswoman Sara Kempin said stores could earn rewards for complying with the law through "secret shopper" operations.

"If they don't make the sale, the ALE officer steps forward with a keychain or some sort of 'yea yea' prize," she said.

ALE Assistant Supervisor Ken Pike said the businesses would not be in danger of citation if they check the ID. "If (the business) checks an ID and it appears reasonably close, the law gives them relief from liability," he said. "(The law) doesn't hold them responsible."

Pike said a bartender or store owner has the right to take a fake ID. He also said the store owner must at least verify the picture, height, weight and hair color before making the sale. "Some places ask questions to engage nervousness," Pike said. "These places don't get caught very often doing anything wrong."

fraud, if customers were not refunded their money.

Bernholz received a copy of an e-mail sent from EZ Student Storage to a parent whose credit card bill was overcharged. The e-mail stated that the data corporation that EZ Student Storage used for credit card billings was responsible for the errors. But the e-mail's sender was blocked, and the letter was unsigned.

The company serves several other schools including Syracuse University, Ithaca College and Villanova University.

Sophomore Christine Benedetti from Pittsburgh, Pa. considered using EZ

Student Storage but decided against it.

But she said she gave the company her credit card number for an initial estimate and that she was charged even though she never used their services. "They didn't only charge it once, they charged it twice for (a total of) \$700," she said.

Benedetti said she, like several other students, had filed complaints with the Orange County Better Business Bureau.

Representatives from the Bureau could not be reached for comment.

Bernholz said she is waiting for the New York Attorney General's Office to contact her with further information about the company.

The University Editor can be reached at udesk@unc.edu.

**SMART GROWTH**

recommendations for policy changes."

One possible change would require the N.C. Department of Transportation to cut down on road construction that contributes to urban sprawl.

The Smart Growth program is an attempt to propose solutions to many of the state's major quality-of-life problems, Hackney said.

Godschalk said, "I think this is a once-in-a-lifetime opportunity for the state to develop its communities."

The State & National Editor can be reached at stntdesk@unc.edu.
