Horoscopes

Capricorn (December 22 - January 19)

Today's Birthday (Feb. 5)

Work is your bane and your boon this year. You're paying dues since the experience you gain is more valuable than the money you earn. By February you should have the job you need. In March you're apt to make communication mistakes. Be careful. You may achieve a new level of understanding in April and possibly a new relationship. In May you win by knowing the rules. In June you can afford to be more lax. Make sure you're on the right path in July. Plan a romantic trip for two in October. Push your career in November. Friends surprise you in December, and you love it.

To get the advantage, check the days right to the easiest day, the most challenging.

Aries (March 21-April 19)
- Today is a 6 - Put off launching a new project. Success will come more easily if you do more research and get more rest before you begin.
- Today is a 5 - You're not trying hard enough. Near busline with screened porch.
- Today is a 7 - To access big money, you must get the job to match your talent and develop the talent to do the job. Give it one more try.
- Today is a 6 - The good news is the money's coming in. The bad news is you don't have enough in savings. Make saving your top priority.
Cancer (June 21-July 22)
- Today is a 7 - A change in your work situation could give you more responsibility. This is no accident. You've been the kind of person who should have more responsibility. Relax and enjoy it.
Leo (July 23-Aug. 22)
- Today is a 6 - You might be taking the wrong approach to a problem at work. You need compassion, not computation. It's an emotional problem, not a mental or mechanical one. Places (Feb. 19-March 20)
- Today is a 7 - Think things over carefully before you speak, but don't get too critical. You may feel you didn't do something right, but the people who matter the most didn't notice. Don't worry about it.
