brilliant pen of

a gentleman distinguished in the annals of litera-  
ture as the 'GOLDSMITH OF AMERICA,' and one of the  
most popular, chaste, lively and versatile, of all  
the gifted writers of the public-press of this  
country. Mr. Taylor has consented to prepare,

terprise which the journalism of the Union will  
be especially able to appreciate, we are confident  
of its approbation; and experience teaches us too  
flatteringly the success which attends such adven-

**TO PRESERVE ICE AND ALWAYS HAVE ICE  
WATER.**—Mr. Editor:—Prepare a double  
green baize or blanket or flannel bag, in the  
shape of a pudding bag. It may be lined  
inside, to keep the fuzz out of the water, with  
a layer of muslin, and covered outside with  
any material for show. Put a sufficient  
quantity of ice in a pitcher of water, and  
cover it with this bag; it preserves the ice  
better than any other mode, and if you use  
ice enough you may always have cold water.  
I have covered my ice water in this way at  
bedtime, and found ice in the pitcher in the  
morning.

I got the idea or pattern from an Irish  
gentleman, many years ago, and named the  
article Paddy's Night Cap. It is better than  
any patent ice pitcher, and can be made for  
a mere trifle.  
REMARKS.—If a small quantity of ice is  
put into a pitcher of water it melts rapidly,  
but a large quantity soon reduces the tem-  
perature of the water, so that it acts as a  
preserver of it with a cold medium, and in  
this way under 'Paddy's Night Cap,' it is  
better preserved than in an ice pitcher.  
—Phil. N. American.

**FEMALES IN LARGE CITIES.**—According to  
the official census of the United States, taken  
in 1850, there were in the City of New York  
354,106 males and 261,441 females, making  
an excess of the latter of 7,335. In Boston,  
there were 65,774 males and 71,107 fem-  
ales, making an excess of the latter of 5,333.  
In the City and county of Philadelphia, there  
were 196,491 males and 212,271 females,  
making an excess of the latter of 15,880.  
Making a total excess of females in the  
above named cities of 28,548.

According to the New York State census  
of 1855, there were in the city of New York  
302,986 males and 320,918 females, making  
an excess of females of 23,932. In the city  
of Brooklyn, there were 97,129 males and  
108,121 females, making an excess of fem-  
ales of 10,992. Making a total excess of  
females in the cities of New York and Brook-  
lyn of 34,924.

From the above official statements it ap-  
pears that the female portion of the popula-  
tion is rapidly increasing in the city of New  
York and its vicinity. In the State of New  
York, at large, there were in 1855 1,727,650  
males and 1,788,562 females, making an ex-  
cess of females of only 10,912; thus show-  
ing that the male population largely exceeds  
the females in the agricultural counties.

**AN ELEPHANT IN THE FROG POND.**—  
There was a crowd of spectators on the Com-  
mon, yesterday morning, between 7 and 8  
o'clock, to witness the freaks of Dan Rice's  
elephant in the frog pond. The animal was  
leath to wet himself at first, but after some  
coaxing he took his bath, to the great delight  
of the juveniles and others who were present.  
The fountain was playing when he first went  
in, which somewhat disturbed him; upon shut-  
ting off the water, however, he leisurely  
walked and rolled about in all parts of the  
pond, throwing the water about, and appar-  
ently delighted with the sport. When near  
the jet, the water was let on again, which  
made his honor bat a hasty retreat. He

is likely to suffer for his gallantry in being

win the hearts of the ladies, and consequen-

polite, genteel, good natured young King.'
