Mechanics, Inventors, Manufacturers and Farmers!

The Scientific American has now reached its Four-

the 11th of September. It is the only weekly publication of the kind now issued in this country, and

it has a very extensive circulation in all the States

of the Union. It is not, as some might suppose from

its title, a dry, abstruse work on technical science; on the contrary, it so deals with the great events

going on in the scientific, mechanical and industrial,

worlds, as to please and instruct every one. If the

Mechanic or Artizan wishes to know the best

machine in use, or how to make any substance em-

ploved in his business, if the Housewife wishes to get

recipt for making a good color, &c .- if the In-

ventor wishes to know what is going on in the way

of improvements-if the Manufacturer wishes to keep

posted with the times, and to employ the best facili

wishes to keep himself familiar with the progress

made in the chemical laboratory, or in the construc-

mowers, and a thousand other machines and appli-

can be found in the Scientific American, and not else

DROSPECTUS OF THE NEW ERA,

COMMERCIAL ADVERTISER.

The undersigned will commence the publication of a journal with the above caption on Wednesday the 20th of July, to be continued every Saturday thereafter, the regular issue of which may be relied on.

The political character of the New Era will be of the same caste as the Union, (which expires with its present issue,) namely Democratic.

The best energies of the proprietors will be directed to any and all measures tending to resuscitate the dormant powers of "Old Athens," and particularly to keep the people posted on what we are really do-ing; with this determination, they will furnish a faithful record of all statistics which may be in their power to obtain, in addition to any commercial information which can conduce to the welfare of our mercantile interests.

The Farmer will find in the NEW ERA a column from which he may glean some information in addi- Half page, tion to his previous store of agricultural knowledge. | Fourth page, The Literary man, will we trust, discover that, in our selections, the constant aim will be to present nothing which can be unworthy the refined taste of

an accomplished gentleman. The Ladies-who, though mentioned last in this classification, have always held the first place in our affections-may be fully assured that, if any matters of interest capable of being construed by them as 'news' can be found in our rambles through the world of letters, we shall consider as prominent among our duties the gathering and placing before them all that may tend to elevate and improve the mind, whether considered in the relation of sisters, mothers, wives or daughters; pledging ourselves that there never shall be found in our paper-in any department, or on any consideration-a word or syllable to offend the dellicacy of the most amiable and virtuous of the sex; for, as we design the NEW ERA to be a herald of the growing prosperity of our town, so do we also desire to be able to chronicle the evi-

dences of her morality.

The Journal will continue, as heretofore, Independent on all subjects. It will take sides with no political party, but will advocate such measures as are thought best calculated to promote the interests

of the country and of our State. As to the different localities in this vicinity, it is not our object to show partiality, but to advocate the claims of Beaufort Harbor, and leave Beaufort, Morehead, and Carolina Cities to stand on their own merits-believing that more good can be accomplished in this way than in discussing the claims or advantages of localities; and we appeal to the citizens, those interested, and to the friends of these places, to give us their support.

The completion of the Atlantic & North-Carolina Railroad is near at hand, and it is very important that the only paper published on this Harbor should be widely circulated, in order that its Commercial advantages may become better known.
