SLEI PING ON A VOLCANO.

We have high authority for stating that before the flood there was marry by sud giving in maringe, up to the day when Noah entered the lark; we know that it was said of old: "The Son of Man cometh like a Thief in the night," and " in the twinkling of an eye we shall be caught up." We know that human affairs often proceed calmity and in their usual routine when the most tremendous crisis are at hand; the people of Pompeil were in the amphitheatre when the emplion of Veauvian overwhelmed them, and Balanzar was feasting his lords while the enemy at the river overflow his city. Later, yet, the ball on the eve of Waterloo is famous; Mr. Everett said well, a year ago; "The ordinary business operations went on in France in the revisition of 1782, till the annihilation of the circulating medium put a stop to every thing that required its use. The theatres and operas and all he other please of cubility manuscants. nating medium put a stop to every thing that re-quired its use. The theatres and operas and all he other places of public ammaement were crow-ded to madness during the reign of terror." The evolution which overturned the theatre of Louis Phillippe occurred two days after the interruption of a banquet, and when no one of the ordin ry av-centions of the business or social world of Paris cations of the business or social world of Paris had been at all interfered with People pard visits and gave balls, and went to the opera, and dreamed not how near was the future, so hig with events. So now, those who farey that because the shops are open and thronged, because the flancure are seen on Bircalway, because parties are given, because the picture galieris are open, and the theatres successful—need not lay the fistering unction to their souls that no revolution is to be apprended here. "The great social machine moves with a momentum that cannot be suddended by stopped." And indeed, when misfortunes are blackest, people sometimes rush to pleasure with ly stopped. And indeed, when misfortunes are blackest, people sometimes rush to pleasure with the maddest zest. The cholera season has been known to be a fortunate one for places of amuse-ment. Three years ago, during the financial pan-ic, New York merchants might be seen every night at the opera, who had inited during the day anxious for a while to distract their minds from the contemplation of what was either unavoida-ble or irremediable. Let not, then, those who are casual observers, fancy they see in their every day life no indications of a storm, that it is sure not to break upon them. We are in the midst of the mest moment us crisis that has oc-curred in the history of the nation; we may be on the brink of revolution; and those who close their eyes to this fact, will be infinitely the most likely to be precipitated.—New York Express.

The despatches from Georgia, say, a number of free negroes have been forcibly taken from Northern vessels in Southern waters, and spiriture of the state of the s ted off, nobody knows where,-in rets for the spiriting away of fugitive slaves, belong-ing to Southern masters, on the Undeground Railroad North; all the difference, however, is that while Republican public sentiment here, encourages, if it does not appland the practice, public sentiment in Georgia and Florida is all against it—as the despatches show.—N.
