Our admirable graded school will close on Thursday night with a delightful, entertainment by the graduating class, and our people are looking forward to it with delightful anticipations, for they

The philosophy of a cold is arrest of the secretions of the skin and mucus membrances. The nervous respiratory explosion, called sneezing, denotes that the sensitive lining of the nasal cavities is irritated, and that the general func-

tions have been interfered with. The causes that underlie a cold are decline of vital force and the impoverishment of the blood. The scientific medical world knows that when all the forces and functions of the body are at par. but had to desist and raise sand on a cold, under ordinary circumstances,

I can't help from wishing and longing force at par, and thus enable the system to test the old saving, that the hair of to ward off colds, he grippe, and other distinguished to the day of the dog is good for the bite, but suppose it will remain one of the air castles that we old country-raised city dwellers the fighting element of the blood.
