Was Reported Sinking

The Vatican, Rome, July 13-Evening. The pope is rapidly sinking. His doctors expect that he will die tonight. Rome, July 13.-7:30 p. m.-It is again emphatically asserted that the pope's end is imminent. The ambassadors of two powers have been informed from the Vatican that it seems impossible, speaking from a human standpoint, for the pope to survive the night.

Rome, July 13. - 12:10 p. m. - The pope's condition took a turn slightly for the worse this morning, but the change does not excite apprehension of an immediate climax. Last night was a sleepless one. The official bulletin frankly speaks of agitated periods during the night and confesses that the general condition of the patient is somewhat more depressed.
