#### pired. Let all renew promptly. Business Morals.

There are men who have two sets o morals-one for Sunday and the other for every day use one for the church and the other for the counting room-one for show and the other for use which they don and doff with as much regularity and as little concern es they change their clothes for Sunday and every day wear. In the family they are regular at prayer and stern in the enforcement of high moral rules and maxims; -in the church they are models of propriety and religious devotion:-in theory they are honest, in talk correct, in appearance and, perhaps, in their own esteem, wanting in nothing that is straightforward, magnanimeus and good. But in actual dealing with their fellows, there is a boundary line marked between theory and practice, and the principles which they preach are put aside as hindrances to their success in business. Be hind the counter they ignore the claims which otherwheres they re cognize that truth has upon them, and forget that it takes as much religion to measure a vard of calico rightly, as it does to preach a sermon. In the office, in the shop, in the market, be fore a jury, -everywhere--we see men violating truth, shirking bold honesty, taking advantage of the ignorance and inpexerience of others, infringing upon rights, because they have the power to do so, and yet retaining their own good opinion of their integrity

Selfishness and greed of gain are like prisms which, when men look through them, refract and discolor the rays of light which fall upon princistand point, one will condemn motives from which he himself would act, or denounce conduct of which he himself would be guilty, if his self-inter est were involved. Most people can preach morality fluently and well, but its practice everywhere, and under all circumstances, distinguishes few.

We need men who in the busy mart of trade will observe the honest dealing that their better natures suggest; who will give the full measure when they sell that they exact when they buy; who will act honestly in both small and large transactions—and they would if they knew the eyes of Society and the officers of the law were resting their gaze upon them Jas. Fisk, Jr. said that his father who was a pedlar, would not tall a lie for a shilling but would at any time tell six for a dollar. We want no Fisks, but men who will tell no falsehoods to turn a penny or make a million.

## A Timely Resolve.

If there is one worldly amusement which the Methodist church considers 'sinful,' and upon which it has set the seal of its condemnation throughout its whole history, that amusement is Dancing. The teachings of our church law, the rulings of our Bishops and the opinions of our godly men have been pronouncedly against it. Of late years many nominal Methoodists have indulged in the amusement, excusing themselves on the ground that there is no specific probibition of dancing in our Discipline, and that their consciences do not upbraid them for such indulgences. These are flimsy excuses, but not reusons. There are many sins which are not enumerated specifically in the Discipline, which nevertheless, the Bible, the Church and all christians condemn. And conscience may be so abused and stifled, that its remonstrating voice cannot be heard:

At the late session of the Charlotte District Conference, a timely action was taken on this subject and the opinion of the ministers and laymen expressed in no uncertain words. The following resolutions introduced were unanimously adopted.

Whereas there is a growing disposition in many places among many of our young people to engage in worldly amusements, especially the fashion able but pernicious sin of modern dancing; and whereas these sinful practices are often not only connived at, but countenanced and encouraged by older members of the church.

most emphatically denounce all such people.) the principles of our holy religion, of the rule of our church on "taking such diversions as cannot be used in the name of the Lord Jesus," and as being clearly included in St. Paul's enumeration of the works of the flesh.

Resolved, That our preachers be re quested to read occasionally that part of the address of our Bishops, published in our discipline, touching on worldly amusements.
