**SMALLPOX PREVENTIVE AND CURE.**

Charlotte News.  
From Col. T. L. Rich the News has received a formula for the prevention and cure of smallpox which it appears has proven to be all that could be desired. It is a very cheap and simple formula, a bottleful costing only about twenty-five cents. It consists of sulphate of zinc, one grain; powdered digitalis, one grain; teaspoonful sugar and four ounces of water. Teaspoonful to be taken every hour.

Col. Ritch says that last winter Mr. Boyce Bell, a well-known resident of Steel Creek township, seven miles south of Charlotte, had eleven persons on his place (a negro woman and ten children) cured of virulent, malignant smallpox with this remedy in a few days. It was also taken by all others on the place afterwards, who never contracted the disease.

Col. Ritch is responsible for its introduction here. It came originally from a Paris medical journal.

**THE DEFEAT OF LOUD.**

Congressman Loud, of California, has been defeated for re-election, despite the enormous influence of the railway corporations. Mr. Loud is the author of the Loud postal bill, which has been so widely discussed in the public press. He has posed as the champion of economy in the postal department, but somehow or other Mr. Loud never seemed disposed to seriously consider the charge that the deficit was due in large measure to the low rates paid to the railroads for transporting the mails, and not to the undue amount of second-class matter carried. It is easily demonstrated—and has been—that the government pays a great more, pound for pound, for having the mails carried than the express companies pay for having their consignments carried. It has been proven time and again that the government pays in the way of rent for postal cars more than the cars cost to build.

A little more of the time devoted to the attempt to increase second-class postage rates would have yielded larger returns if spent in trying to make the railroads deal fairly with the government.—Bryan's Commoner.

**PROMINENT PEOPLE.**
