Omo will be watched this year. What has been done can be done again, and James E. Campbell has been elected Gwernor of Ohio. There is no divid d sentiment as to Campbell.

Wm appreciate the words of kind ness which continue to be showered upon us by the press of the State and wish that we had space to publish them all. Every mail also brings in letters of congratulation, and best of all, these are always accompanied by a subscription:

THE question as to whether the competition of electric railways would affect the traffic rates of steam railroads has had a partial answer. So far as local traffic in the territory around large cities is concerned fares on the trunk line railroads are coming down. The Baltimore and Ohio Railroad Company has arranged for a considerable cut in rates on commutation books, family know I ever had the piles only when tickets and regular tickets between certain points. This reduction in Mackae. rates amounts to about 25 per cent. and it will be so much money saved from Spain in large quantities. to the suburban resident, who seeks the quiet of the country for his home while engaged in business in the city. That this action on the part of one of the great trunk line rail-roads will be imitated by others is highly probable. It may be assumed that it results directly from the introduction and indefinite extension of street cars propelled by electricity. Within certain radii of the cities of Philaderphia, Bultimore, Washington and Pittaburg, the traffic mansgers have seen their patrons leaving the steam road and seeking the cheaper transportation of the trolly car. It has been even suggested that at no distant day hourly electric cars may be flying to and fro between such points as Raleigh and Durham, or Raleigh and Goldsboro, or Greensboro and Charlotte. If this should come to pass the directors of the North Carolina Railroad may come in for a respite from the vials of wrath which are now being
