THURSDAY, OCTOBER 21, 1896.

The New Orleans Picayune observes that it is reported that the public is about to have an opportunity to observe closely how women jurors will try divorce and breach of promise cases. Under the new constitution of Kentucky women are eligible for jury service, and it is the intention to give the experiment a fair trial. One case in which they are soon to hear testimony is that brought by a young woman against a wealthy widower for alleged breach of promise. Damages are set at a high figure, and, to add to the defendant's horror, the presiding judge has declared that the trying jury will be composed wholly of women.

It would be interesting to guess at the amount of money which was carried out of Raleigh by Sells' circus. Did any of our readers ever think about how much money a circus makes in each town? The general agent of Sells' circus, when here three or four weeks ago making a contract for advertising the show, had quite a discussion with us as to the amount which the show would take in and offered to bet that the receipts at both the day and night performances would not reach \$5,000. We estimated that the receipts from the crowd present at the day performance alone touched the \$5,000 mark, but there is no way of ascertaining definitely. That is one of the things the circus people take care of among themselves so far as the outside public is concerned.

A story is going the rounds that the million cancelled postage stamp collection which some one is trying to make, has led to a very embarrassing international postal complication in Illinois. Some one started a collection of canceled postage stamps by means of that scheme known as the "chain system." It worked so successfully that the house, the barn, the corn crib of the crippled girl they were to benefit were soon filled with canceled, American stamps. Then the "chain" spread to Europe, and the letters continue to come in by the thousands. So many of these letters have not the full postage paid that it is estimated it costs the government \$40 a day in losses, as the girl simply refuses to take such letters as were not fully prepaid out of the office, and the post office department can do nothing but return them to the dead letter office. Already 25,000,000 stamps have been received, and still they come, and nobody knows how to stop them.

The New York Times says: "Mr. Thoman's final estimate of the corn crop, published yesterday is 2,400,000 bushels. This exceeds by 12 1/2 per cent., or about 300,000 bushels, the largest crop (1895) heretofore harvested, is almost double the size of last year's crop, and is larger than the crop of 1893 or that of 1892 by nearly 50 per cent. The quality appears to be very good, and the average yield per acre was considerably in excess of the yield in either of the two years (1895 and 1891) when the crop was more than 2,000,000 bushels. It is noticeable that the exports of corn are unusually large, the quantity shipped

abroad since June 30 having been 19,002,021 bushels, as against only 3,074,939 in the corresponding period of last year. If this rate should be maintained—and we presume it will be increased—the exports for the entire twelve months will exceed those of any previous year. The crop of oats is the second of our cereal crops in size, and the yield this year has been extraordinarily large. Mr. Thoman's estimate is 280,000,000 bushels, or about 200,000,000 bushels more than was ever harvested before, the largest crop up to this year having been 751,000,000 in 1889, while the average for the three years immediately preceding the phenomenal harvest now reported was about 683,000,000."

LOTS OF HEAT IN OUR COAL.

The same can't be said of all coal, which varies greatly in quality. What is offered the public ought to be clear from rubbish; we take care of this matter. It ought to be of quality which, while it burns well, makes a strong and lasting fire. You know there are sorts of coal which make a brilliant fire, but its brilliancy and comfort are too short lived, and cost too much in the way of renewel. Knowing the trade well we have bought for domestic consumption, we believe with good judgment, and offer to share the advantage of the deal.

BUSINESS SUITS

Are in order with the advent of autumn activity. No clothing suits business at all unless it fits neatly and perfectly. No garment fits properly unless it's made to order. That's the first axiom of dress, and it doesn't need proving. It's as plain as the multiplication table that our made-to-order suits are unequalled in town.

YOU RECOGNIZE THAT

Every time you see one of our suits which are exactly what they should be in every particular. The logic of facts is unanswerable.
