WILL BE TRIED IN DURHAM.

Halticks, the Forger, who Faced a Durham to look after the forger, who was arrested there for attempting to forge checks on Durham tobacco men. Mr. Hearst went to Durham to see if the authorities had sufficient evidence to make out a good case against the forger, who gives his name as Halticks, otherwise he would have been returned to Raleigh.

ELLINGTON WINS.

The Supreme Court yesterday afternoon rendered a decision in the case of Stanford vs. Ellington. Justice Fitch delivered the opinion. The case involves the title to the office of State Librarian, the plaintiff, H. H. Stanford, having his claim upon an election by the Legislature under an act of the last Assembly amending Section 3065 of the Code, which section formerly provided for an election of State Librarian by the trustees of the Library. In the election by the Legislature the plaintiff received a majority of the votes cast. The members voting numbered twenty-six Senators and forty-eight members of the House. The Supreme Court sustains the judgment of the court below and holds that the plaintiff Stanford is not entitled to recover; that the election was invalid by reason of the fact that Stanford did not receive a majority of the votes of both Houses of the General Assembly, and that the members voting (26 Senators and 48 members of the house) did not constitute a quorum. It was further held that the voting by roll call is a "divulsion," and as the names thus recorded were less than a quorum, the presumption of the presence of a quorum arising from the fact that a quorum had voted upon a division on a previous vote at the same sitting, is rebutted.

As it is unpleasant, to be the least, to walk under a roof that takes a first step in a threat of falling, and which, in the case of a fall, is heavy enough to crash right on through to the hunters of fossils and fossils, this paper is glad to state that repairs are being actively made.

The result was disastrous. For the big iron wheel ground and scuffed down the sited hardness of the brick. And when its triumphant march was over, there lay deep furrows in the hard, smooth surface of the paving, where the big iron wheels had sunk down like those of a wagon rolling over gravel.
